

Panini TWAIN Interface Download

This information is confidential and for use only by those companies that have signed a non-disclosure agreement (NDA) with Panini.

This software is for use with the Vision X, Vision 1, My Vision X and i:Deal units in conjunction with Panini Universal Installer API version 4.5 or higher.

Accessing the Download Files:

Open your browser and go to Files.Panini.com

USER: pnadownloads
PASS: PN@sfd34!

Open the Panini Support Downloads folder

-Download the following zip file:

Panini Twain Interface Setup.exe

Software Installation:

To install the Panini TWAIN interface, simply double-click the file 'Panini TWAIN Interface Setup.exe'. The InstallShield wizard will initialize to begin the installation process. Please note that version 4.5 or greater of the Panini Universal Installer is required, which will be installed during the setup silently.

Upon completion of the InstallShield wizard, you should now be able to see 'Panini TWAIN Interface' added to the list of your TWAIN sources in your TWAIN application.

The Panini scanner can also be tested outside of any TWAIN application by using the Panini MultiDemo application loaded during setup. A shortcut will be created on the user desktop after completion.
