

FX Services Tailored for Hedge Funds

Comprehensive pretrade, trade execution and post-trade services by a trusted global bank

J.P. Morgan offers hedge funds a tailored range of services throughout the foreign exchange (FX) trade life cycle. These services enable our hedge fund clients to make informed pretrade investment decisions, implement trades through multiple channels and platforms, optimize the use of cash and manage post-trade processes, including confirmations and comprehensive portfolio reporting.

BENEFITS AND FEATURES

Benefit	Features
Enhance Returns	<ul style="list-style-type: none"> J.P. Morgan is a global leader in FX, executing 8-10% of the market's daily trade volume of \$3.2 trillion. Our broad market-making capabilities span 200 currency pairs and an array of FX products, including share class hedging. Our award-winning proprietary trading systems are integrated with third-party e-dealing platforms. Capabilities include trade confirmations, a post-trade portal and J.P. Morgan ACCESSSM Portfolio Reporting.
Increase Efficiency	<ul style="list-style-type: none"> We provide powerful interactive tools and an unparalleled selection of data and market reports, across all asset classes. Our team of more than 400 elite professionals in Sales, Trading and Research supports clients globally. Global FX desks and Client Service teams provide 24-hour support.
Mitigate Risk	<ul style="list-style-type: none"> Global advantages include large trade execution, access to market intelligence and our firmwide risk management focus and expertise. Innovative, proprietary models and analytics available on the MorganMarkets Web site enable clients to gain greater transparency and accurate information to support their evolving strategies and needs.

Highlights

- Pretrade tools such as research, topical articles and convenient Web tools help clients make investment decisions.
- Value-added services include Passive Currency Overlay for share class and portfolio hedging.
- Integrated asset servicing offers additional value: When J.P. Morgan serves as custodian (and the client's portfolio meets diversification and liquidity guidelines), mark to market and up-front cash collateral are not required.

Integrated Capabilities Include:

- Cash management
- Collateral management
- Securities lending
- Derivatives
- Long/short trading services
