J.P. MORGAN ELECTRONIC CLIENT SOLUTIONS

JPM-X Guidelines for Hong Kong
J.P. Morgan Broking (Hong Kong) Limited (JPM Broking) operates an alternative liquidity pool (ALP) in Hong Kong listed cash equities and exchange-traded funds through its crossing service (JPM-X). JPM Broking is licensed by the Securities and Futures Commission (SFC) and JPM-X operates under a Type 7 license (providing automated trading services) granted by the SFC. These ALP guidelines (Guidelines) are prepared to provide comprehensive details relating to the operations of JPM-X.

In the Guidelines, clients who are permitted to route orders to JPM-X are referred to as users, which has the same meaning under Paragraph 19.2(g) of the Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission (Code of Conduct).

Unless a user has opted-out of interacting with JPM-X entirely, each user will be deemed to have accepted these Guidelines when submitting orders in Hong Kong listed cash equities and exchange-traded funds.

For more information, please contact your J.P. Morgan Electronic Client Solutions contact or ecs-asia@jpmorgan.com.

JPM-X is operated by JPM Broking as follows:

(a) Trading and operational matters

**Hours of Operation:** JPM-X is operated during the “Pre-opening” auction, and the “Morning” and “Afternoon” sessions of continuous trading on the Stock Exchange of Hong Kong Limited (SEHK).

**Products to be Traded:** Hong Kong listed cash equity and/or exchange-traded funds.

**Manner of Operation:** Orders submitted to JPM-X are not displayed to any parties other than staff involved in the operation of JPM-X. Please refer to section (k) of the Guidelines for further information.

Orders to JPM-X are received through the operation of various algorithmic and smart order routing (SOR) execution services¹ or are sent specifically for participation in JPM-X (Directed Orders).

Orders received during the pre-opening auction without any peg instruction will be eligible for matching at the auction uncross price. Any overlapping orders will be crossed once the auction uncross price is disseminated. Any unfilled or partially filled orders from the pre-opening auction session will be rolled into the continuous trading session. During the continuous trading session, JPM-X offers real-time matching of orders.

¹ J.P. Morgan’s algorithmic and SOR execution services are provided by J.P. Morgan Securities (Asia Pacific) Limited, which is an affiliate of JPM Broking.
All incoming orders during the continuous trading session, regardless of their origin, are eligible for real-time matching based on the liquidity available in the order book, depending on whether the particular incoming order:

1) has a participation constraint limiting the order flow type that it may be crossed against; and/or
2) is committed to a conditional quote message in the conditional order process (as described below).

All executions in the continuous trading session within JPM-X occur at or within the prevailing best bid and offer price publically disseminated by the SEHK and are consistent with all applicable price and quantity conditions placed on each order. Those conditions include minimum fill size requirements as well as price parameters that are associated with any orders that are pegged to track market prices (e.g. “Mid”).

Order Side Restrictions: Short sale orders are not accepted.

Suspension of Trading: JPM-X may be suspended at the sole discretion of JPM Broking at any time without prior notice. Reasons for the suspension of JPM-X include, but not limited to when, (i) the SEHK is closed, (ii) a Volatility Control Mechanism is triggered (iii) market data is unavailable, or (iv) JPM Broking is unable to report matches to the SEHK within the prescribed timeframe for any reason.

Supported Order types: JPM-X accepts limit orders and market orders which have the option of being pegged to:

1) Mid: the midpoint of the prevailing best bid and offer
2) Far: the best offer
3) Near: the best bid

JPM-X supports the following Time in Force instructions:

1) DAY: the order will remain on the JPM-X order book for the current trading day and any unexecuted portion will be cancelled at the end of the day.
2) IOC: an immediate or cancel order instruction will fill to the extent it can and the remainder will be cancelled.

Conditional Order Process: As a technical design, JPM-X provides a process for finding potential trading interest using conditional parameters, called the Conditional Order Process. Trading interest is represented as a conditional order message from J.P. Morgan’s Algo/SOR to JPM-X which describes the relevant trading criteria. The message is marked as conditional and therefore is not executable. If and when contra-side trading interest arises that could potentially match against the conditional order, an internal undisplayed invitation will be returned from JPM-X to the Algo/SOR. Upon receipt of the invitation, the Algo/SOR
has the option to send an executable order to JPM-X.

Conditional order messages and invitations sent during the Conditional Order Process are handled on an automated basis between the Algo/SOR and JPM-X and are not disseminated externally. The conditional order message is solely limited to orders using J.P. Morgan’s Algo/SOR and is not available to users sending Directed Orders.

(b) User restrictions

In accordance with Paragraphs 19.2(g), 19.4 and Section 7 of Schedule 8 to the Code of Conduct, JPM-X is offered only for the use by, and for the benefit of, qualified investors (as defined in the Paragraph 19.2(f) of the Code of Conduct).

JPM Broking reserves the right to limit or prohibit use of JPM-X at its own discretion.

Users must be familiar with, and agree to abide by, all applicable rules and regulations, including any requirements imposed by SEHK.

(c) Opt-out arrangement

Users may opt-out of interacting with JPM-X entirely at any time.

(d) User priority, order routing and execution methodology

Routing of Orders: JPM-X only accepts inbound user orders and does not route orders outbound to any internal or external destination.

JPM Broking’s algorithmic and SOR execution services may access the following external ALPs with effect on or after 1st January 2022.

<table>
<thead>
<tr>
<th>Firm</th>
<th>ALP Name</th>
<th>Link to Disclosure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liquidnet Asia Limited</td>
<td>Liquidnet Asia System</td>
<td><a href="https://www.liquidnet.com/transparency-regulatory">https://www.liquidnet.com/transparency-regulatory</a></td>
</tr>

</tr>
</tbody>
</table>

Clients will need to explicitly opt-in to access the external ALP(s). If opted-in, clients may opt-out at any time upon request.

User Priority & Execution Methodology: During the continuous trading session, JPM-X constantly looks for crossing opportunities at or within the prevailing best bid and offer price
for orders. Eligible orders received during the pre-opening auction phase can be matched at the auction uncross price (as outlined in section (a) above).

JPM-X does not execute a cross if the stock is crossed (i.e. where the bid price exceeds the offer price), locked (i.e. where the bid price is equal to offer price), or if there is a one sided order book (i.e. no bid/offer price). JPM-X also does not execute a cross during a market-wide trading halt or suspension of specific securities. Additional crossing restrictions may be imposed from time to time as JPM Broking deems appropriate.

In looking for crossing opportunities, JPM-X complies with any applicable participation instructions associated with each user’s order. All orders, once found eligible for crossing, are executed on the basis of price/time priority.

The order book is tiered using the order flow types as follows:

<table>
<thead>
<tr>
<th>Tier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>i</td>
<td>Institutional Flow</td>
</tr>
<tr>
<td>ii</td>
<td>Broker-Dealer Flow (Aggregator)</td>
</tr>
</tbody>
</table>

Users who are permitted to route orders to JPM-X may choose to opt-out of interacting with one or more tiers.

**Reporting:** Once a cross has been executed on JPM-X, the trade is immediately reported by JPM Broking to the SEHK.

(e) **Transaction pricing**

There are no additional fees incurred by users of JPM-X beyond standard agency commission charges.

(f) **Order cancellation**

At its absolute discretion, JPM Broking may cancel any orders resting, or trades executed, in JPM-X. In such instances, JPM Broking will contact impacted users and advise of such cancellations.

(g) **Internal control procedures to ensure the fair and orderly function and address potential conflict of interest issues**

J.P. Morgan has risk management policies and procedures in place to address risks to operations across subsidiaries and affiliates, including JPM Broking and the operation of JPM-X. These procedures address, among other things, system capacity, security, and contingency planning. The JPM-X matching engine processing capacity is regularly reviewed to ensure that it can handle the system’s average and peak message and order
volumes.

J.P. Morgan also has policies and procedures to mitigate actual or potential conflicts of interest arising during the operation of JPM-X. Mitigating factors relevant to JPM-X include, but are not limited to, the following:

1) Users may choose to opt-out of interacting with JPM-X entirely.
2) User orders are treated equally within JPM-X. No preferential treatment is given to any particular user or tier within JPM-X.
3) Users may choose to opt-out of interacting with a particular tier.
4) JPM-X is an un-displayed venue with all orders placed onto its order book given full anonymity.
5) JPM-X does not allow for the use of indications of interest.
6) Procedures are in place to ensure that only authorized staff has access to JPM-X’s production systems and data-storage facilities.

(h) Potential risks

JPM-X has dependencies on services provided by the SEHK, including those for market data dissemination and trade reporting. Failure to receive accurate and timely bids or offers, or trade reporting acknowledgements within regulatory requirements, could impact the operation of JPM-X. Similarly an internal failure of a trading component could temporarily impact users’ ability to enter, cancel, amend or receive acknowledgements or executions.

(i) Transaction of proprietary orders in JPM-X

J.P. Morgan orders, inclusive of internal proprietary or principal trading operations (as defined by Paragraph 19.2(e) of the Code of Conduct) are restricted from participating in JPM-X.

(j) Whether the orders of different users of JPM-X may be aggregated

Orders from different users are not aggregated.

(k) Staff access to real-time trading information concerning orders placed into, and transactions conducted in JPM-X

Please refer to the table on the next page.

Note: Other teams (such as Operations and Compliance) may have access to trading information on a post execution basis.

We may from time to time amend these Guidelines. The most recent version will be available on the J.P. Morgan website at [https://www.jpmorgan.com/directdoc/hk_jpm-x_guidelines.pdf](https://www.jpmorgan.com/directdoc/hk_jpm-x_guidelines.pdf) or on request.
This material has been prepared by personnel in the Sales and Trading Departments of one or more affiliates of JPMorgan Chase & Co. (together, “J.P. Morgan”) and not by J.P. Morgan’s Research Department and therefore, has not been prepared in accordance with legal requirements to promote the independence of research, including but not limited to, the prohibition on the dealing ahead of the dissemination of investment research. It is not a research report and is not intended as such. It is for distribution to institutional and professional clients only and is not intended for retail customer use.

It is provided on a confidential basis and may not be reproduced, redistributed or disseminated, in whole or in part, without the prior written consent of J.P. Morgan. Any unauthorized use is strictly prohibited.

Unless otherwise specifically stated, any views or opinions expressed herein are solely those of the individual author and/or the specific Sales and Trading area from which it originates and may differ from the views or opinions expressed by other areas of J.P. Morgan, including the Research Department.

This material is provided for information purposes only, does not supersede any agreement in place between you and any relevant J.P. Morgan affiliate, and does not bind J.P. Morgan in any way. It is not intended as a recommendation (except to the extent it is an “investment recommendation” under MAR (as defined below)) or an offer or solicitation (except to the extent covered by CFTC Rules (as defined below)) for the purchase or sale of any security or financial instrument, or to enter into a transaction involving any financial instrument or trading strategy, or as an official confirmation or official valuation of any transaction mentioned herein. Any pricing information provided is indicative only and does not reflect a level where J.P. Morgan is prepared to execute a trade. J.P. Morgan is not an advisor. Nothing in this material should be construed as investment, tax, legal, accounting, regulatory or other advice (including within the meaning of Section 15B of the Securities Exchange Act of 1934) or as creating a fiduciary relationship.

MAR Disclosure: Where this material is an “investment recommendation” as that term is defined in Article 3(1)(35) of the EU and UK Market Abuse Regulation (“MAR”), distribution of this material is subject to the relevant provisions of MAR. For more information, please consult: [www.jpmm.com/#mardisclosures](http://www.jpmm.com/#mardisclosures).

Research Disclosure: This material is not, and is not intended to be, a “research report”, “investment research” or “independent research” as may be defined in applicable laws and regulations worldwide. However, it may constitute “research” as defined in Recital 28 of the Commission Delegated Directive (EU) 2017/593 and in the Financial Conduct Authority’s Handbook.

Derivatives Disclosure: Where distribution of this material is subject to the rules of the U.S. Commodity Futures Trading Commission (“CFTC”), it is a “solicitation” of derivatives business generally only as that term is used within CFTC Rule 1.71 and 23.605 promulgated under the U.S. Commodity Exchange Act (the “CFTC Rules”).

Options Disclosure: Structured securities, options, futures and other derivatives are complex instruments and may involve a high degree of risk. Before entering into any such transactions, please ensure that you have read and understood the Options Clearing Corporation’s Characteristics and Risks of Standardized Options, also known as the options disclosure document (ODD) available at: [http://www.theocc.com/about/publications/character-risks.jsp](http://www.theocc.com/about/publications/character-risks.jsp).

Exchange Traded Fund (“ETF”) Disclosure: Each U.S. registered ETF has filed a registration statement (including a prospectus) with the U.S. Securities and Exchange Commission. Each non-U.S. ETF will have its own offering documents as required by applicable law. No offer or sale of the ETFs described may be made except pursuant to the prospectus or offering documents, as applicable. The ETF’s prospectus and/or offering documents are available through the ETF issuer’s website; you should read these carefully before deciding to invest.

Transactions involving securities, financial instruments and strategies mentioned herein may not be suitable for all investors. You are solely responsible for deciding whether any investment or transaction is suitable for you based upon your investment goals, financial situation and tolerance for risk. If you deem it necessary, you must seek independent professional advice to ascertain the investment, legal, tax, accounting, regulatory or other consequences before investing or transacting.

Past or simulated past performance (including back-testing) is not indicative of future results. The investments discussed may fluctuate in price or value. Changes in rates of exchange may have an adverse effect on the value of investments. Any modelling, scenario analysis or other forward-looking information herein (such as projected cashflows, yields or returns) is intended to illustrate hypothetical results based on certain assumptions (not all of which will be specified herein). Actual events or conditions may differ materially from those assumed; therefore, actual results are not guaranteed.

All market prices, data and other information (including that which may be derived from third party sources believed to be reliable) are not warranted as to completeness or accuracy and are subject to change without notice. J.P. Morgan disclaims any responsibility or liability to the fullest extent permitted by applicable law, whether in contract, tort (including, without limitation, negligence), equity or otherwise, for any loss or damage arising from any reliance on or the use of this material in any way. The information contained herein is as of the date and time referenced only, and J.P. Morgan does not undertake any obligation to update such information.

J.P. Morgan may have positions (long or short), effect transactions or make markets in securities or financial instruments mentioned herein (or related instruments), or provide advice or loans to, or participate in the underwriting or restructuring of the obligations of, the legal entities mentioned herein. The Sales and Trading personnel who prepared this material may be compensated in part based on trading activity. Moreover, Sales and Trading personnel may have acted on the basis of this material either on behalf of J.P. Morgan or, where permitted, in their personal accounts. As such, this material should not be relied upon as either objective or independent from the interests of J.P. Morgan and its associated personnel, which interests may conflict with your interests.
