

GUIDE TO YOUR STATEMENT

Your statement may contain the following sections:

Your Portfolio at a Glance: Reflects the net equity of your account at the close of the statement period, the net equity of your last statement and any change since the last statement. Sweep Program Balance represents money market fund shares or bank deposit balances (as described in the prospectus or bank deposit program description) generated from the "sweep" of available credit balances in your account.

Market Value of Your Portfolio: A graph reflecting the change in the market value of your account portfolio from the market value reflected on your last statement (Cash and Money Market Funds, Equities, Mutual Funds, Fixed Income, Other).

Cash Flow Analysis: Shows your opening and closing cash/sweep program balances. Cash Flow Analysis reflects the categories of activity. **Opening Balance** is the credit or debit carried over from the previous period's closing balance. **Closing balance** is the combination of the total debits and credits for the statement period together with the opening balance. A debit balance (money you owe us) is indicated by a minus sign in these sections.

Income Summary: Reflects the total dividend, interest and other income amounts for the statement period and year to date. Any tax withheld, margin interest and miscellaneous charges are included here if applicable.

Distribution Summary: Reflects returns on capital, liquidations, and other income for the statement period and current year.

Retirement Plan: Reflects the contributions received and distributions paid during this statement period as well as for the previous year.

Your Portfolio Allocation: A pie chart defining your asset allocations (Cash and Money Market Funds, Equities, Mutual Funds, Fixed Income, Other).

Portfolio Value: Reflects a summary of cash and money market funds, equities, mutual funds, and fixed income for the statement period.

Bonds with 60 – Day Horizon: Reflects bonds that will mature or are subject to redemption within the next 60 days.

Your Portfolio Holdings: Reflects cash and money market funds and all securities in your account. Accrued interest represents interest earned but not yet paid or collected on fixed income securities since the last coupon date. There is no guarantee that this interest will be paid by the issuer.

Estimated Yield ("EY") and Estimated Annual Income ("EAI"): Estimated annual income is calculated by multiplying either the current coupon rate or an estimated annual dividend (generally calculated by annualizing the most recent regular cash dividend) by the quantity of the security held. For balances other than sweep program balances, Estimated Yield is calculated by dividing Estimated Annual Income by the market value of the security. These figures are estimates based on mathematical calculations using data obtained from outside sources. Because prices of securities, coupon and dividend rates are subject to change at any time, these estimates should not be relied upon exclusively for making investment, trading or tax decisions. Because different asset types (e.g., equities versus fixed income securities) tend to have different investment characteristics, these estimates should not be compared across asset types. These calculations are for informational purposes only and are not a projection or guarantee of future returns. Additionally, please note that EAI and EY for certain types of Securities might include Return of Principal or Capital Gains. Please contact your account executive if you desire additional information.

Market Prices.

The market value of your holdings are as of the last business day of the statement period. Prices for determining market values represent estimates. These estimates are obtained from multiple sources, including J.P. Morgan Securities LLC (together with its affiliates "JPMS"), and outside services. Pricing estimates may be based on bids, prices within the bid/offer spread, closing prices or matrix methodology that uses data relating to other securities whose prices are more ascertainable to produce a hypothetical price based on the estimated yield spread relationship between the securities. Pricing estimates do not constitute bids for any securities.

Actual prices realized at sale may be more or less than those shown on your statement. Unpriced Direct Participation Program (DPP) and Real Estate Investment (REIT) Securities: DPP and REIT securities are generally illiquid and the value of the security will, generally, be different from its purchase price. Accurate valuation information is not available. The total cost basis for each security position and the unrealized gain/loss are provided solely as a general indication of performance and should not be used for tax purposes or otherwise relied upon without the assistance of your tax advisor. With respect to security positions received into your account, cost basis information, if any, has been provided by you. Cost basis information relating to securities positions consisting of more than twenty tax lots (purchases and re-investments) is displayed in the aggregate as one short term and one long term tax lot. Further information is available from your broker. Cost basis information has been provided by you or by a third party on your behalf, and not by JPMS. Cost basis information relating to your mutual funds holdings, regardless of the number of tax lots, is displayed in the aggregate as one short term tax lot and one long term tax lot. Further information is available from your broker.

§ The original cost basis of this position has been adjusted to reflect amortization or accretion.
