

# J.P. Morgan Access® Account Analysis

## Straight Through Report and No Activity Accounts

### What's Different?

## Introduction

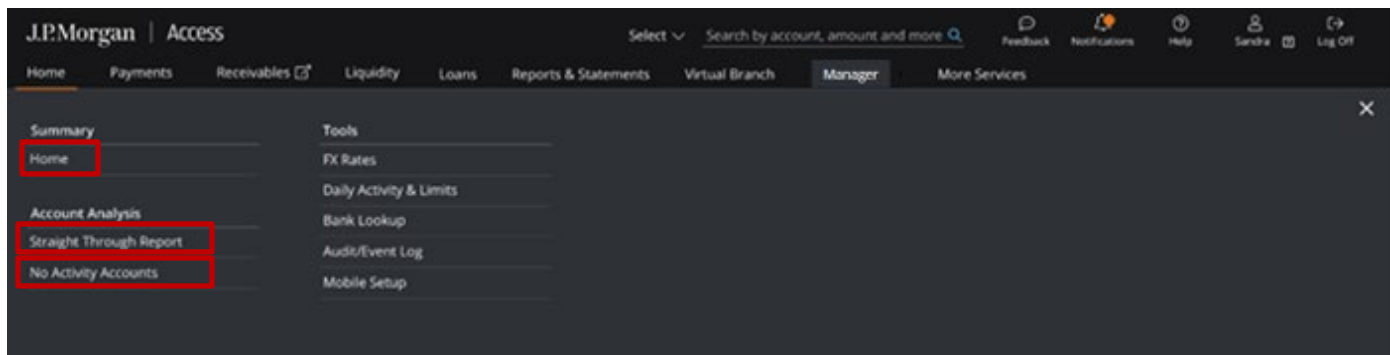

Access offers a way to make payment repair and activity information more readily available to entitled users.

## Account Analysis

From the Home menu, go directly to the two key Account Analysis pages below.

The following dashboard widgets are available:

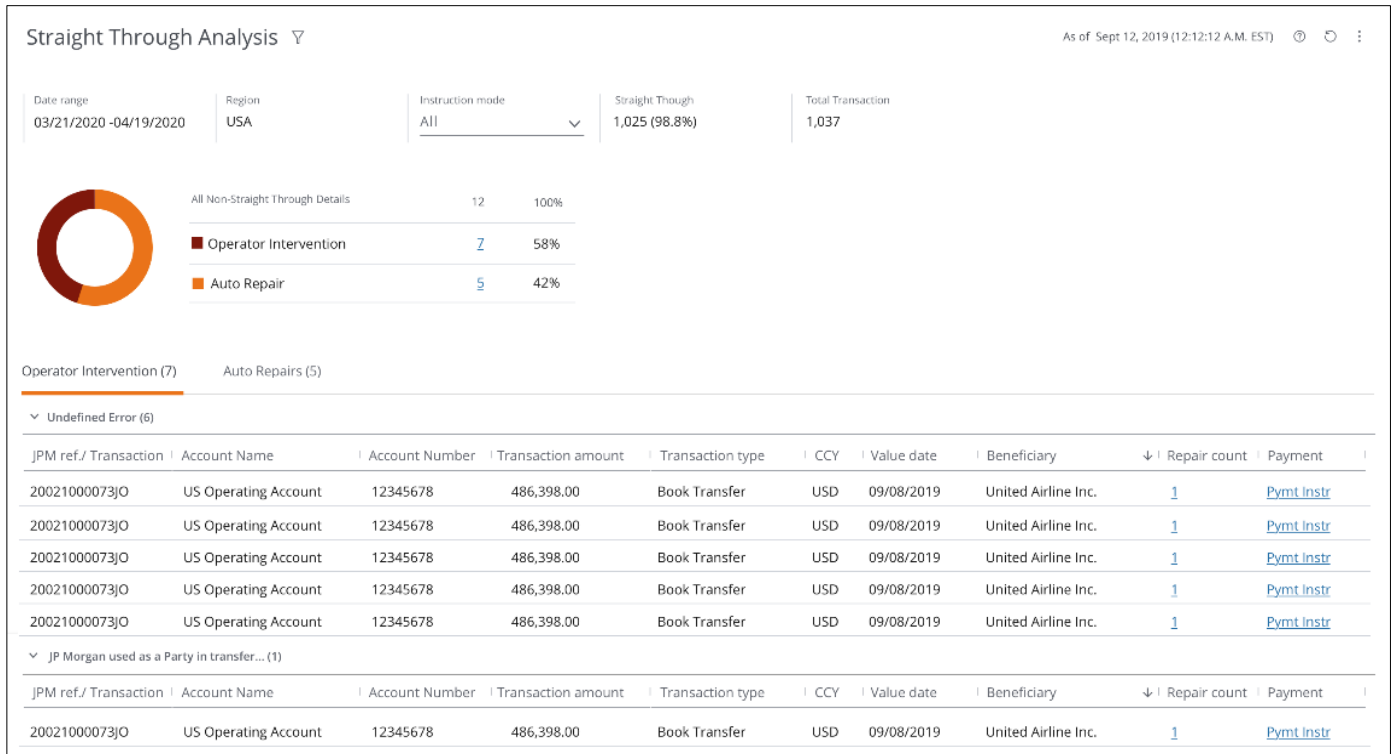

- **Straight Through Report:** Presents information about straight-through processing performance of payments to help identify and address frequent causes of repair and reduce inquires.
- **No Activity Accounts Report:** Identifies accounts with no payment activity over 30, 60 or 90 days. Use the information to detect potential unused funds.

## Straight Through Report

This report displays all transactions that were repaired.

- The overall straight-through processing rate is presented. There is also a breakdown between payments repaired by operator intervention and payments that were repaired automatically.
- Specific transactions that required repair—and the reasons for the repairs—are listed and grouped by reason codes.

## No Activity Accounts

This grid lists accounts that have had no payment activity during the selected period in the last 30, 60 or 90 days.
