**DIRECTORS' REPORT
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025**

The Directors are pleased to submit their report to the members together with the audited financial statements of the Bank for the financial year ended 31 December 2025.

PRINCIPAL ACTIVITIES

The principal activities of the Bank are banking and related financial services.

There was no significant change in the nature of these activities during the financial year.

FINANCIAL RESULTS

	RM'000
Net profit for the financial year	<u>309,147</u>

DIVIDENDS

No dividend has been paid, declared or proposed since the end of the Bank's previous financial year. The Directors do not recommend the payment of any dividend for the financial year ended 31 December 2025.

RESERVES AND PROVISIONS

There were no material transfers to or from reserves and provisions during the financial year other than those disclosed in the financial statements.

SHARE CAPITAL

During the financial year, there was no issuance of new ordinary shares. As at 31 December 2025, the issued share capital of the Bank is RM437,500,002 comprising 395,500,002 ordinary shares.

EQUITY COMPENSATION BENEFITS

The ultimate holding company, JPMorgan Chase & Co. ("JPMC", "The Firm") has a Long-Term Incentive Plan ("LTIP") that provides for grants of common stock-based awards, including stock options, restricted stock, and restricted stock units ("RSU") to certain key employees employed by JPMC and its subsidiaries. JPMC also grants stock options to other employees as recognition of the services rendered, under its broad-based employee stock option plan such as the Value Sharing Plan.

Details of the equity compensation benefits are set out in Note 34 to the financial statements.

DIRECTORS' REPORT
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

DIRECTORS

The Directors of the Bank in office during the financial year and during the period from the end of the financial year to the date of the report are as follows:

Osman Tarique Morad
Robert Armor Morris
Mahani binti Amat
Wong Hooi Ching
Gail Koh De Josselin (resigned on 15 January 2026)
Lalitha A/P Rajah Manikam (appointed on 15 January 2026)

In accordance with Clause 93 of the Bank's Constitution, Robert Armor Morris retires by rotation at the forthcoming Annual General Meeting and, being eligible, offers himself for re-election.

In accordance with Clause 97 of the Bank's Constitution, Lalitha A/P Rajah Manikam, who was appointed to the Board after the last Annual General Meeting, retires at the forthcoming Annual General Meeting and, being eligible, offers herself for re-election.

DIRECTORS' BENEFITS

Neither during nor at the end of the financial year was the Bank a party to any arrangements whose object was to enable the Directors of the Bank to acquire benefits by means of the acquisition of shares in, or debentures of, the Bank or any other body corporate except that certain Directors received remuneration as Directors and employees of the Bank and related corporations, and share options granted to Directors of the Bank by the ultimate holding company.

Since the end of the previous financial year, no Director of the Bank has received or become entitled to receive any benefit (other than the benefits shown under Directors' Remuneration as disclosed in this Directors' Report and Note 26 to the financial statements) by reason of a contract made by the Bank or a related corporation with the Director or with a firm of which the Director is a member, or with a company in which the Director has a substantial financial interest.

DIRECTORS' INTEREST IN SHARES AND OPTIONS

According to the Register of Directors' Shareholdings kept by the Bank under Section 59 of the Companies Act 2016, the following Directors who held office at the end of the financial year have interest in the shares, restricted stock units and share options (collectively "Shares") of the Bank and/or its related corporations during the financial year, as set out below. None of the other Directors who held office at the end of the financial year have any interest in the Shares of the Bank and/or its related corporations during the financial year.

	Number of Shares

DIRECTORS' REPORT
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

DIRECTORS' REMUNERATION

Details of Directors' remuneration are set out below:

	RM'000
Salary, bonuses and other remuneration	4,623
Defined contribution retirement plan	555
Benefits-in-kind	75
Fees/allowances	681

AUDITORS' REMUNERATION

Auditors' remuneration of the Bank is RM515,305.

BAD AND DOUBTFUL DEBTS

Before the financial statements of the Bank were prepared, the Directors took reasonable steps to ascertain that proper action had been taken in relation to the writing off of bad debts and the making of provision for doubtful debts and satisfied themselves that all known bad debts had been written off and that adequate provision had been made for doubtful debts.

At the date of this report, the Directors are not aware of any circumstances which would render the amounts written off for bad debts or the amount of the provision for doubtful debts in the financial statements of the Bank inadequate to any substantial extent.

CURRENT ASSETS

Before the financial statements of the Bank were prepared, the Directors took reasonable steps to ascertain that any current assets, other than debts, which were unlikely to be realised in the ordinary course of business including the values of current assets as shown in the accounting records of the Bank had been written down to an amount which the current assets might be expected to realise.

At the date of this report, the Directors are not aware of any circumstances which would render the values attributed to current assets in the financial statements of the Bank misleading.

VALUATION METHODS

At the date of this report, the Directors are not aware of any circumstances which have arisen which would render adherence to the existing methods of valuation of assets or liabilities in the Bank's financial statements misleading or inappropriate.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

**DIRECTORS' REPORT
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)**

CONTINGENT AND OTHER LIABILITIES

At the date of this report, there does not exist:

- (a) any charge on the assets of the Bank which has arisen since the end of the financial year which secures the liability of any other person; or
- (b) any contingent liability in respect of the Bank which has arisen since the end of the financial year other than in the ordinary course of banking business.

No contingent or other liability of the Bank has become enforceable or is likely to become enforceable, within the period of twelve months after the end of the financial year which, in the opinion of the Directors, will or may affect the ability of the Bank to meet its obligations when they fall due.

CHANGE OF CIRCUMSTANCES

At the date of this report, the Directors are not aware of any circumstances not otherwise dealt with in this report or the financial statements of the Bank which would render any amount stated in the financial statements misleading.

ITEMS OF AN UNUSUAL NATURE

The results of the Bank's operations during the financial year were not, in the opinion of the Directors, substantially affected by any item, transaction or event of a material and unusual nature.

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely to affect substantially the results of the Bank's operations for the current financial year in which this report is made.

DIRECTORS' REPORT
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

BUSINESS STRATEGY AND REVIEW 2025

Despite continued uncertainty throughout 2025, the Bank's key businesses, in particular transaction services, trade, wholesale banking and markets flow business, delivered satisfactory results in 2025.

The Bank recorded a profit before tax of RM410 million in financial year 2025, an increase of RM79 million against financial year 2024. Net interest income increased by RM158 million or 248% to RM221 million, contributed by the decrease in interest expense arising from deposits and placements of banks and other financial institutions by RM231 million, offset by the decrease in interest income from money at call and placements with financial institutions by RM116 million. Other operating income decreased by RM58 million or 11%, mainly arising from decrease in gain from foreign exchange contracts by RM117 million, offset by increase in net gain on derivatives of RM23 million as compared to net loss of RM21 million in 2024. Meanwhile, operating expenses increased by RM13 million or 5% to RM256 million.

The Bank's total assets increased by RM1.2 billion or 4% to RM28 billion, contributed by the increase in cash and short-term funds and securities purchased under resale agreements of RM1.6 billion and RM677 million respectively, offset by the decrease in financial assets held at fair value through profit and loss of RM1.4 billion. The Bank's total liabilities increased by RM 888 million or 4% to RM26 billion, contributed by the increase in deposits from customers, obligations on securities sold and deposits and placements of banks and other financial institutions by RM1.2 billion, RM924 million and RM311 million respectively. This is offset by the decrease in amount due to related parties by RM1.6 billion. The Bank's total capital ratio remained strong at 32.027%, with its Tier 1 capital ratio at 31.795% as at the end of 2025.

BUSINESS OUTLOOK FOR 2026

Malaysia remains an open, export-oriented economy influenced by global conditions, with steady growth supported by resilient domestic demand and ongoing fiscal reforms. Government programs in digital transformation and energy transition continue to enhance productivity and attract investment. Against this backdrop, the Bank continues to provide corporate and institutional clients transaction services, trade and wholesale banking, including cash management, payments and trade finance. Clients benefit from our broad product suite, deep local knowledge, and the reach of our global network.

Our commitment to developing our business in Malaysia has allowed us to become a leader among foreign banks in the country, and we are confident of further growth with the support of the Bank's strong capitalisation, global network and fortress balance sheet.

(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements and are also consistent with those applied in the previous year, unless otherwise stated.

A BASIS OF PREPARATION

The financial statements of the Bank have been prepared in accordance with the Malaysian Financial Reporting Standards ("MFRS"), International Financial Reporting Standards ("IFRS") and the requirements of the Companies Act 2016 in Malaysia.

The financial statements have been prepared on a going concern basis under historical cost convention unless otherwise indicated in this summary of material accounting policies.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported year. It also requires the Directors to exercise their judgement in the process of applying the Bank's accounting policies. Although these estimates are based on the Directors' best knowledge of current events and actions, actual results may differ. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in accounting policy Note Q.

- (a) Standards, amendments to published standards and interpretations that are effective and applicable to the Bank.

The following standards and amendments have been adopted for the first time by the Bank for the financial year beginning on 1 January 2025:

- Amendments to MFRS 121 'Lack of Exchangeability'

The adoption of the amendment listed above did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

A BASIS OF PREPARATION (CONTINUED)

- (b) Standards, amendments to published standards and interpretations to existing standards that are applicable to the Bank but not yet effective.

A number of new standards and amendments to standards and interpretations are effective for financial year beginning on or after 1 January 2026:

- Amendments to MFRS 9 and MFRS 7 'Amendments to the Classification and Measurement of Financial Instruments' (effective 1 January 2026) have:
 - require financial assets to be derecognised on the date the contractual rights to the cash flows expire and financial liabilities to be derecognised when obligation under the contract is discharged (i.e. the settlement date). In addition, there is an optional exception to derecognise financial liabilities before the settlement date for settlement using electronic payment systems (if specified criteria are met);
 - clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest ("SPPI") criterion;
 - add new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
 - update the disclosures for equity instruments designated at fair value through other comprehensive income ("FVOCI").

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

A BASIS OF PREPARATION (CONTINUED)

- (b) Standards, amendments to published standards and interpretations to existing standards that are applicable to the Bank but not yet effective. (continued)

A number of new standards and amendments to standards and interpretations are effective for financial year beginning on or after 1 January 2026. (continued)

- MFRS 18 'Presentation and Disclosure in Financial Statements' (effective 1 January 2027) replaces MFRS 101 'Presentation of Financial Statements'.
 - The new MFRS introduces a new structure of profit or loss statement.
 - Income and expenses are classified into 3 new main categories:
 - i. Operating category which typically includes results from the main business activities;
 - ii. Investing category that presents the results of investments in associates and joint ventures and other assets that generate a return largely independently of other resources; and
 - iii. Financing category that presents income and expenses from financing liabilities.
 - Entities are required to present two new specified subtotals: 'Operating profit or loss' and 'Profit or loss before financing and income taxes'.
 - Management-defined performance measures are disclosed in a single note and reconciled to the most similar specified subtotal in MFRS Accounting Standards.
 - Changes to the guidance on aggregation and disaggregation which focus on grouping items based on their shared characteristics.

The adoption of the above amendments to published standards are not expected to give rise to any material financial impact to the Bank, except for the adoption of MFRS 18 and amendments to MFRS 9, of which the Bank is in the midst of assessing the financial and disclosure impact to the Bank.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

B INCOME RECOGNITION

Interest income is recognised in the Statement of Comprehensive Income using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts the expected future cash payments or receipts through the expected life of the financial instrument, or when appropriate, a shorter period, to the net carrying amount of the instrument. When calculating the effective interest, the Bank estimates cash flows (using projections based on its experience of customers' behaviour) considering all contractual terms of the financial instrument but excluding future credit losses. Fees are included in the calculation to the extent that they can be measured and are considered to be an integral part of the effective interest rate.

Interest income for financial assets measured at amortised cost and FVOCI is recognised in the Statement of Comprehensive Income as part of interest income.

Interest income for financial assets measured at FVTPL is recognised separately in the Statement of Comprehensive Income.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

C RECOGNITION OF FEES AND OTHER INCOME

The Bank earn fees and other income from a diverse range of products and services provided to its customers. Fees and other income are recognised when the Bank has satisfied its performance obligation in providing the promised products and services to the customer, and is recognised based on contractual rates or amount agreed with customers, and net of expenses directly related to it. The Bank generally satisfies its performance obligations and recognises the fees and other income on the following basis:

- (i) Transaction-based fee and other income is recognised on the completion of the transaction. Such fees include fees related to the service charges and fees, and loans and advance arrangement fees. These fees constitute a single performance obligation.
- (ii) For a service that is provided over a period of time, fee and other income is recognised on an equal proportion basis over the period during which the related service is provided or credit risk is undertaken. This basis of recognition most appropriately reflects the nature and pattern of provision of these services to the customers over time. Fees for these services will be billed periodically over time. Such fees include commitment fee income, which relates to loans and guarantee fees

Net gain or loss from sales of financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income are recognised in the Statement of Comprehensive Income upon sales of the securities, as the difference between net sales proceeds and the carrying amount of the financial assets.

(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

D REPURCHASE AGREEMENTS

Securities purchased under agreements to resell, and securities sold under agreements to repurchase, are treated as collateralised lending and borrowing transactions respectively. The consideration for the transaction can be in the form of cash or securities. If the consideration for the purchase or sale of securities is given in cash the transaction is recorded on the balance sheet within securities purchased/sold under agreements to resell/repurchase. If the consideration is received or given in the form of securities the transaction is recorded off balance sheet. The difference between the sales and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

E FINANCIAL ASSETS AND LIABILITIES

(a) Recognition of financial assets and financial liabilities

The Bank recognises financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on the trade-date, which is the date on which the Bank commits to purchase or sell an asset.

(b) Classification and measurement of financial assets and financial liabilities

On initial recognition, financial assets are classified as measured at amortised cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss ("FVTPL"). The classification is based on both the business model for managing the financial assets and their contractual cash flow characteristics. Factors considered by the Bank in determining the business model for a group of assets including the past experience on how the cash flows for these assets were collected, how the assets' performance is evaluated and reported to key management personnel, how risks are assessed and managed, and how managers are compensated.

On initial recognition, financial liabilities are classified as measured at either amortised cost or FVTPL.

(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

E FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(c) Subsequent measurement

There are three measurement categories into which the Bank classifies its financial assets:

(i) Amortised cost

Financial assets are measured at amortised cost if they are held under a business model with the objective to collect contractual cash flows ("Hold to Collect") and they have contractual terms under which cash flows are solely payments of principal and interest ("SPPI"). In making the SPPI assessment, the Bank considers whether the contractual cash flows are consistent with a basic lending arrangement (i.e., interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement).

Interest income from these financial assets is included in interest income using the effective interest method. Any gain or loss arising on derecognition is recognised directly in the income statement and presented in net gain and loss from financial instruments together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the income statement.

Financial assets measured at amortised cost include cash and short-term funds, loans and advances, certain securities purchased under resale agreements, amount due from related parties, statutory deposits with BNM and other assets.

Financial liabilities are measured at amortised cost unless they are held for trading or designated as measured at fair value through profit or loss.

(ii) Fair value through other comprehensive income ("FVOCI")

Financial assets are measured at FVOCI if they are held under a business model with the objective of both collecting contractual cash flows and selling the financial assets ("Hold to Collect and Sell"), and they have contractual terms under which cash flows are SPPI.

Financial assets measured at FVOCI are initially recognised at fair value, which includes direct transaction costs. The financial assets are subsequently remeasured at fair value with any changes presented in other comprehensive income ("OCI") except for changes attributable to impairment, interest income and foreign currency exchange gains and losses.

Interest income from these financial assets is included in interest income using the effective interest method. Foreign exchange gains and losses are presented in other gains/(losses) on financial instruments and impairment losses are presented as separate line item in the Statement of Comprehensive Income.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

E FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(c) Subsequent measurement (continued)

(iii) Fair value through profit or loss ("FVTPL")

Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVTPL. The Bank may also irrevocably designate financial assets at FVTPL if doing so significantly reduces or eliminates a mismatch created by assets and liabilities being measured on different bases. Fair value changes are recognised in the income statement and presented net within other gains/(losses) on financial instruments in the period which they arise. Transaction costs of financial assets carried at FVTPL are expensed off in the income statement.

Financial assets measured at FVTPL include fixed income securities and reverse repurchase agreements.

Financial liabilities measured at FVTPL include structured deposits and repurchase agreements.

(d) Impairment of financial assets and lending-related commitments

Instruments in scope of Traditional Credit Product ("TCP") include loans and advances, lending-related commitments, and other lending products stemming from extensions of credit to borrowers. The Bank establishes an expected credit losses allowance ("ECL") for these instruments to ensure they are reflected in the financial statements at the Bank's best estimate of the net amount expected to be collected. The ECL is determined on in-scope financial instruments measured at amortised cost or FVOCI. ECL is measured collectively via a portfolio-based (modelled) approach for Stage 1 and 2 assets but are generally measured individually for Stage 3 assets. ECL is forecasted over the 12-month term (Stage 1) or expected life (Stage 2 or 3) of in-scope financial instruments, where the forecast period includes the reasonable and supportable ("R&S") forecast period, the reversion period and the residual period and considers the time value of money.

Determining the appropriateness of the allowance is complex and requires judgment by management about the effect of circumstances that are inherently uncertain. Further, estimating the allowance involves consideration of a range of possible outcomes, which management evaluates to determine its best estimate. Subsequent evaluations of the TCP portfolio, in light of the circumstances then prevailing, may result in significant changes in the ECL in future periods.

The Bank must consider the appropriateness of decisions and judgements regarding methodology and inputs utilised in developing estimates of ECL each reporting period and document them appropriately.

Note 32 provides more detail on how the expected credit loss allowance is measured.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

E FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(e) Derecognition of financial assets and financial liabilities

Financial assets are derecognised when the contractual right to receive cash flows from the asset has expired, or has been transferred with either of the following conditions met:

- (i) the Bank has transferred substantially all the risks and rewards of ownership of the asset; or
- (ii) the Bank has neither retained nor transferred substantially all of the risks and rewards; but has relinquished control of the asset.

Financial liabilities are derecognised when they are extinguished, that is when the obligation is discharged, cancelled or expires.

(f) Write-off

Loan and advances on the balance sheet are written off when it is highly certain that a loss has been realised. The determination of whether to recognise a write-off includes many factors, including the prioritisation of the Bank's claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity or the loan collateral.

All other financial assets are written off when there is no reasonable expectation of recovery and the amount of loss can be reasonably estimated or when the asset is past due for a specified period.

(g) Determining fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair values are determined by reference to observable market prices where available and reliable. Fair values of financial assets and financial liabilities are based on quoted market prices or dealer price quotations for financial instruments traded in active markets. Where market prices are unavailable, fair value is based on valuation models that consider relevant transaction characteristics (such as maturity) and use as inputs observable or unobservable market parameters, including but not limited to yield curves, interest rates, volatilities, equity or debt prices, foreign exchange rates and credit curves. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value.

For financial assets and liabilities held at fair value, most market parameters in the valuation model are either directly observable or are implied from instrument prices. When input values do not directly correspond to the most actively traded market parameters, the model may perform numerical procedures in the pricing such as interpolation.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

E FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(h) Regulatory reserve requirements

Pursuant to BNM Guidelines on Financial Reporting, the Bank shall maintain, in aggregate, Stage 1 and Stage 2 provisions and regulatory reserves of no less than 1% of all credit exposures (on and off balance sheet that are subject to MFRS 9 impairment requirements, excluding exposures to and with an explicit guarantee from Malaysia Government, Bank, a licensed bank, a licensed investment bank, a licensed Islamic Bank and a prescribed development financial institution) net of Stage 3 provision.

F DERIVATIVE FINANCIAL INSTRUMENTS

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and option pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are separately accounted for at fair value, with changes in fair value recognised in the income statement.

G OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset, and the net amount presented in the Statement of Financial Position when there is currently legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Bank or the counterparty.

H IMPAIRMENT OF NON-FINANCIAL ASSETS

Non-financial assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). Prior impairments of non-financial assets (other than goodwill) are reviewed for possible reversal at each reporting date.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

I FIXED ASSETS

Fixed assets are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation of fixed assets is calculated on a straight-line basis over the estimated useful lives.

The principal useful lives used are as follows:

	<u>Years</u>
Bank premises	
- improvements, furniture and fittings	Lower of the remaining lease term or 10 years
- office machinery and equipment	5
Computers	3 - 5

The residual values and useful lives are reviewed and adjusted if appropriate, at each balance sheet date.

Depreciation on capital work-in-progress commences when the assets are ready for their intended use.

At each balance sheet date, the Bank assesses whether there is any indication of impairment. Where an indication of impairment exists, the carrying amount of the asset is written down to its recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in the income statement.

J CURRENCY TRANSLATIONS

(a) Functional and presentation currency

The financial statements are presented in Ringgit Malaysia ("RM"), which is the Bank's functional and presentation currency.

(b) Foreign currency transactions and balances

Monetary assets and monetary liabilities in foreign currencies are translated into Ringgit Malaysia at rates of exchange ruling on the balance sheet date. Income and expense items denominated in foreign currencies are translated into Ringgit Malaysia at exchange rates prevailing at the date of the transactions. Any gains or losses arising on translation are taken directly to the income statement.

Non-monetary items denominated in foreign currencies that are stated at historical cost are translated into Ringgit Malaysia at the exchange rate ruling at the date when the transaction was initially recognised.

Non-monetary items denominated in foreign currencies that are stated at fair value are translated into Ringgit Malaysia at foreign exchange rates ruling at the dates when the fair values were determined. Translation differences arising on non-monetary items measured at fair value are recognised in the income statement except for differences arising on FVOCI non-monetary financial assets, which are included in the OCI reserve.

**SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)**

K CURRENT AND DEFERRED INCOME TAX

Income tax payable on taxable profits (current tax) is recognised as an expense in the period in which the profits arise. Income tax recoverable on tax allowable losses is recognised as a current tax asset only to the extent that it is regarded as recoverable by offset against taxable profits arising in the current or prior period. Current tax is measured using tax rates and tax laws that have been enacted or substantively enacted at the balance sheet date.

Deferred tax is provided in full, using the liability method, on temporary differences arising from the differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates and legislation enacted or substantively enacted by the balance sheet date, which are expected to apply when the deferred tax asset is realised or the deferred tax liability is settled. Deferred tax assets and liabilities are only offset when there is both a legal right and an intention to settle on a net basis. Current tax and deferred tax are recognised directly in equity if the tax relates to items that are recognised in the same or a different period in equity

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

**SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)**

L EMPLOYEE BENEFITS

Short-term employee benefits

Wages, salaries, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the period in which the associated services are rendered by employees of the Bank.

Defined contribution plan

A defined contribution plan is a pension plan under which the Bank pays fixed contributions to the national pension scheme, Employees' Provident Fund ("EPF").

Obligations for contributions to defined contribution pension plans are recognised as an expense and charged to the income statement on an accrual basis.

Share-based payment awards

Staff costs include equity compensation expenses arising from the grant of share-based awards to the employees of the Bank which are equity-settled. The details of the share-based awards available are described in Note 34.

Share-based payment awards may be made to employees of the Bank under the Firm's incentive awards schemes. The fair value of any such shares, rights to shares or share options is measured when the conditional award is made. This value is recognised as the compensation expense to the Bank over the period to which the performance criteria relate together with employer's other payroll taxes. All of the awards granted are equity settled. The Firm estimates the level of forfeitures and applies this forfeiture rate at the grant date.

The Bank has recognised all equity compensation benefits as equity-settled, whereby all these employee benefit expenses are credited to "Option reserve" under equity. For employee benefit expenses where the Bank has an obligation to settle with JPMorgan Chase & Co the corresponding amounts are transferred from "Option reserve" to "Other liabilities".

M PROVISION AND CONTINGENT LIABILITIES

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, when it is probable that an outflow of economic benefits will be required to settle the obligation, and when a reliable estimate of the amount of the obligation can be made.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one of more uncertain future events not wholly within the control of the Bank, or a present obligation that arises from past events but is not recognised because either an outflow of economic benefits are not probable or the amount of the obligation cannot be reliably measured. For contingent liabilities that are not recognised in the financial statements, disclosure is made unless the probability of settlement is remote.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

N FINANCIAL GUARANTEE CONTRACTS

Financial guarantee contracts are contracts that require the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument.

Financial guarantee contracts are recognised as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value.

The fair value of financial guarantees is determined as the present value of the difference in net cash flows between the contractual payments under the debt instrument and the payments that would be required without the guarantee, or the estimated amount that would be payable to a third party for assuming the obligations.

Financial guarantee contracts are subsequently measured at the higher of the amount determined in accordance with the expected credit loss model under MFRS 9 "Financial instruments" and the amount initially recognised less cumulative amount of income recognised in accordance with the principles of MFRS 15 "Revenue from Contracts with Customers", where appropriate.

O CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash and short-term funds of three months or less, and amount due from related parties. Only short-term deposits under amount due from related parties are considered as cash and cash equivalents.

P LEASES

Leases are recognised as right-of-use ("ROU") asset and a corresponding liability at the date on which the leased asset is available for use by the Bank (i.e. the commencement date).

ROU Asset

The ROU asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the lease commencement date plus any initial direct costs incurred, less any lease incentives received. The ROU asset is subsequently amortised on a straight-line basis from the commencement date to the earlier of the end of the useful life of the ROU asset or the lease term. The estimated useful life of the ROU asset is determined on the same basis as those of the property and equipment. In addition, the ROU asset may be reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

P LEASES (CONTINUED)

Lease Liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the Bank's incremental borrowing rate. The lease liability is measured at amortised cost using a constant periodic rate of interest. It is remeasured when there is a change in an index or rate, or if the Bank changes its assessment of whether it will exercise an extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the ROU asset, or is recorded in earnings if the carrying amount of the ROU asset has been reduced to zero.

The Bank presents the lease liabilities as a separate line item in Note 18 to the Statement of Financial Position. Interest expense on the lease liability is presented within the operating expense in the Statement of Comprehensive Income.

Short-term leases and leases of low-value

The Bank has elected not to recognise ROU assets and lease liabilities for short-term leases of real estate as well as equipment that have a lease term of 12 months or less and leases of low-value assets.

Q CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In the process of applying the Bank's accounting policies, management makes judgements, estimates and assumptions for certain categories of assets and liabilities. These judgements, estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the balance sheet date, and the reported amounts of revenue and expenses during the reporting period. Making judgements, estimates and assumptions can involve levels of uncertainty and subjectivity and therefore actual results could differ from the reported amounts.

Some of the judgements, estimates and assumptions management makes when preparing the Bank's financial statements involve high levels of subjectivity and assessments about the future and other sources of uncertainty. Those that may have a material impact on the Bank's financial condition, changes in financial condition or results of operations are described below.

(a) Fair value of financial instruments

The Bank carries a significant portion of its assets and liabilities at fair value on a recurring basis. Certain financial instruments are classified on the basis of valuation techniques that feature one or more significant inputs that are unobservable, and for them, the measurement of fair value is more judgemental:

- Judgements - In classifying a financial instrument in the valuation hierarchy judgement is applied in determining the observability and significance of the inputs to the fair value measurement. A financial instrument's categorisation within the valuation hierarchy is based on the lowest level of input that is significant to the fair value measurement.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

SUMMARY OF MATERIAL ACCOUNTING POLICIES
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

Q CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

(a) Fair value of financial instruments (continued)

The Bank carries a significant portion of its assets and liabilities at fair value on a recurring basis. Certain financial instruments are classified on the basis of valuation techniques that feature one or more significant inputs that are unobservable, and for them, the measurement of fair value is more judgemental (continued):

- Estimates - For instruments classified in level 3, management judgement must be applied to assess the appropriate models and level of valuation adjustments. Details on the Bank's level 3 financial instruments and the sensitivity of their valuation to the effect of applying reasonable possible alternative assumptions in determining their fair value are set out in Note 32.

(b) Measurement of the Expected credit losses ("ECL")

An allowance for ECL is required for financial assets measured at amortised cost and fair value through other comprehensive income as well as lending-related commitments such as loan commitments and financial guarantees. The measurement of ECL requires the use of complex models and significant assumptions about future economic conditions and credit behaviours. Explanation of the inputs, assumptions and estimation techniques used in measuring ECL are further detailed in Note 32, which also sets out key sensitivities of the ECL to changes in these inputs.

A number of significant judgements are also required in measuring ECL, such as:

- Determining the criteria for identifying when financial instruments have experienced a significant increase in credit risk;
- Choosing appropriate forecasts and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type financial instrument/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

For Multinational Corporations ("MNC") exposures which are not supported by a legally enforceable guarantee, management makes judgement based on local standalone risk grading for ECL measurement.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

8 AMOUNTS DUE FROM RELATED PARTIES

	<u>2025</u> RM'000	<u>2024</u> RM'000
Current deposits	901,950	242,546
Other receivables	74,084	380,602
	<u>976,034</u>	<u>623,148</u>

9 STATUTORY DEPOSITS WITH BNM

The non-interest bearing statutory deposits are maintained with BNM in compliance with Section 26(2)(c) of the Central Bank of Malaysia Act, 2009, the amount of which is determined at set percentages of total eligible liabilities.

As of 31 December 2025, the Bank has RM2,000 (2024: RM2,000) statutory deposits with BNM.

10 OTHER ASSETS

	<u>2025</u> RM'000	<u>2024</u> RM'000
Receivable from securities sold pending settlement	343,472	176,015
Other receivable, deposits and prepayments	13,796	11,014
	<u>357,268</u>	<u>187,029</u>

11 DEFERRED TAX ASSETS

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred taxes relate to the same tax authority. The following amounts, determined after appropriate offsetting, are shown in the Statement of Financial Position.

	<u>2025</u> RM'000	<u>2024</u> RM'000
Excess of depreciation over capital allowances	(307)	(358)
Financial assets held at fair value through other comprehensive income	-	(20)

29 SIGNIFICANT RELATED PARTY TRANSACTIONS AND BALANCES (CONTINUED)

Transactions with related parties are aggregated because these transactions are similar in nature and no single transaction with these parties is significant enough to warrant separate disclosure.

Interest rates on deposits were at normal commercial rates.

Key management compensation:

	<u>2025</u> RM'000	<u>2024</u> RM'000
Short-term employee benefits	<u>16,834</u>	<u>15,553</u>
	Unit	Unit
Shares, restricted stock units and share options balance of ultimate holding corporation	<u>31,336</u>	<u>31,710</u>

Included in the above is the Executive Directors' compensation which is disclosed in Note 26. The shares, restricted stock units and share options are granted on the same terms and conditions as those offered to other employees of the Bank.

Credit exposures arising from transactions with connected parties

Credit exposures with connected parties as per BNM's revised "Guidelines on Credit Transactions and Exposures with Connected Parties" are as follows:

	<u>2025</u> RM'000	<u>2024</u> RM'000
Outstanding credit exposures with connected parties	<u>744,736</u>	<u>662,386</u>
Percentage of outstanding credit exposures to connected parties as proportion of total credit exposures	<u>12.52%</u>	<u>11.92%</u>
Percentage of outstanding credit exposures with connected parties which is non-performing or in default	<u>0%</u>	<u>0%</u>

30 NON-CANCELLABLE OPERATING LEASE COMMITMENTS

The Bank has lease commitments in respect of vehicles, which is classified as operating leases. A summary of the non-cancellable long-term commitments representing minimum rentals which the Bank is obliged to pay are as follows:

	<u>2025</u> RM'000	<u>2024</u> RM'000
Payable within one year	187	156
Payable between one and five years	591	778
	<u>778</u>	<u>934</u>

31 CAPITAL ADEQUACY

The capital adequacy ratios of the Bank are computed in accordance with Bank Negara Malaysia's revised Risk-Weighted Capital Adequacy Framework: Standardised Approach for Credit and Market Risk, and Basic Indicator Approach for Operational Risk (Basel II).

The capital adequacy ratios of the Bank are as follows:

	<u>2025</u> RM'000	<u>2024</u> RM'000
<u>Tier-I capital</u>		
Paid-up share capital	437,500	437,500
Retained earnings	2,320,725	2,017,803
Fair value reserve through other comprehensive income	-	64
Option reserve	11,953	11,953
	<u>2,770,178</u>	<u>2,467,320</u>
Deferred tax assets	(6,096)	(5,879)
Financial assets at fair value through other comprehensive income	-	(35)
Total Tier I capital	<u>2,764,082</u>	<u>2,461,406</u>
<u>Tier-II capital</u>		
Regulatory reserve	13,890	7,665
ECL not credit-impaired	6,216	7,364
Total Tier II capital	<u>20,106</u>	<u>15,029</u>
Total capital	<u>2,784,188</u>	<u>2,476,435</u>
Common Equity Tier 1 capital ratio	31.795%	28.009%
Tier 1 capital ratio	31.795%	28.009%
Total capital ratio	<u>32.027%</u>	<u>28.180%</u>

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT

The Bank has developed and implemented comprehensive policies and procedures to identify, mitigate and monitor risk across the entity which are based on the Firm's policies. These practices rely on constant communications, judgement and knowledge of products and markets by the people closest to them, combined with regular oversight by a central risk management group and senior management.

(i) Credit risk

Approach to measuring expected credit losses

The Bank estimates credit impairment through an allowance for expected credit losses ("ECLs"). ECLs are recognised for financial assets that are measured at amortised cost or FVOCI and for specified lending-related commitments, such as loan commitments and financial guarantee contracts. The measurement of ECLs must reflect:

- (a) An unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes;
- (b) The time value of money; and
- (c) Reasonable and evidence-based information about past events, current economic conditions, and forecasts of future economic conditions.

The measurement of ECL also reflects how the Bank manages the financial instruments it uses for credit risk purposes such as Traditional Credit Products ("TCP"), debt securities measured at FVOCI, and non-traditional credit products ("Non-TCP"). TCP are wholesale loans and lending-related commitments from extensions of credit to borrowers (including intercompany and affiliated entities); debt securities which are debt instruments such as government bonds; whereas Non-TCP are all other debt financial assets measured at amortised cost which include, but are not limited to, reverse repurchase agreements, margin loans, fee receivables, and inter-company receivables (such as cash and deposits).

The following table sets out the balances of the Bank's financial assets that are measured at amortised cost or FVOCI by the respective TCP, Non-TCP and debt securities categories.

<u>Balance sheet categories</u>	<u>31 December 2025</u>

(i) Credit risk (continued)

Expected credit loss measurement (continued)

Approach to measuring expected credit losses (continued)

The following table sets out the balances of the Bank's financial assets that are measured at amortised cost or FVOCI by the respective TCP, Non-TCP and debt securities categories. (continued)

<u>Balance sheet categories</u>	<u>31 December 2024</u>		
	<u>TCP</u> RM'000	<u>Non-TCP</u> RM'000	<u>Debt securities</u> RM'000
<u>Assets</u>			
Cash and short-term funds	-	9,044,675	-
Financial assets at fair value through other comprehensive income ("FVOCI")	-	-	197,650
Loans and advances	579,505	-	-
Amount due from related parties	-	623,148	-
Other assets	-	186,262	-
	<u> </u>	<u> </u>	<u> </u>

Off-balance sheet lending-related commitments which are categorised as TCP with an ECL allowance of RM1,666,000 (2024: RM743,000,) and is reported in other liabilities are not included in the table above.

Impact of staging on measuring expected credit losses

ECLs are measured using a three stage model based on changes in credit quality of the financial instrument since it was initially recognised ("initial recognition"):

- Stage 1 – performing financial instruments that have not had a significant increase in credit risk since initial recognition;
- Stage 2 – performing financial instruments that have experienced a significant increase in credit risk; and
- Stage 3 – non-performing financial instruments that have been determined to be credit-impaired.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

Impact of staging on measuring expected credit losses (continued)

Stage 3 - Default and credit-impairment

Financial instruments are included in Stage 3 when there is objective evidence of impairment at the reporting date. For Stage 3 instruments, ECL is calculated considering the probability of default over the remaining life of each instrument ("lifetime ECL") on an individual asset basis and interest income is calculated on the net carrying amount (that is, net of the allowance for expected credit losses). All financial assets, regardless of their category as TCP, Non-TCP or debt security, are considered to be credit-impaired and included in Stage 3 when one or more of the following events that has a detrimental impact on the estimated future cash flows of that financial asset has occurred:

- (a) Significant financial difficulty of the issuer or the borrower;
- (b) A default or past due event;
- (c) The Bank has granted a concession to the borrower for economic or contractual reasons relating to the borrower's financial difficulty;
- (d) It has become probable the borrower will enter bankruptcy or other financial reorganisation;
- (e) An active market for that financial asset no longer exists because of the borrower's financial difficulties; or
- (f) A financial asset is purchased or originated at a deep discount that reflects a credit loss has been incurred.

The criteria above are consistent with how the Bank defines 'default' for internal credit risk management purposes.

A financial asset is considered to no longer be in default (i.e. the default has been cured) when the borrower has made payments for a minimum of six months and there is other objective evidence of credit improvement.

Stage 2 - Significant increase in credit risk

Financial instruments that have experienced a significant increase in credit risk ("SICR") since initial recognition for which there is no objective evidence of impairment are included in Stage 2. For Stage 2 instruments, ECL is calculated considering the probability of default over the remaining life of the instrument ("lifetime ECL") on a collective basis and interest income is calculated on the gross carrying amount of the asset (that is, without deduction for the expected credit loss allowance).

The Bank assesses for evidence of a SICR by considering whether there has been a change in the risk of a default occurring since the financial instrument was initially recognised.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

Stage 2 - Significant increase in credit risk (continued)

For TCP, the Bank assesses SICR based on a combination of qualitative and quantitative assessments, as described in more detail below:

- Quantitative criteria

The Bank determines whether the probability of a default ("PD") occurring has changed between a financial instruments initial recognition and the reporting date of a financial instrument. If the change in PD exceeds certain relative and thresholds, the instrument has experienced a SICR. The assessment of the PD takes into account reasonable and supportable information, including information about past events, current and future economic conditions.

- Qualitative criteria

The Bank monitors borrowers that may become impaired by including them on its watch list. Obligors that are on the watch list are considered to have experienced SICR. The Bank also monitors changes in internal credit risk ratings (relative to the credit rating on initial recognition) and delinquency triggers to determine if a borrower has experienced SICR.

The Bank's TCP portfolio is mostly comprised of large, international, wholesale borrowers. For these borrowers, short-term delinquencies alone are not considered to be a meaningful credit quality indicator as the Bank's experience has shown that other internal credit quality indicators generally identifies increases in credit risk well before delinquency. As such, the Bank has determined that using the quantitative and qualitative criteria described above are most appropriate for capturing SICR for TCP.

Financial instruments that are in Stage 2 are moved to Stage 1 in the period that the quantitative and qualitative criteria for a SICR no longer exist.

The approach for determining whether there has been a SICR for Non-TCP portfolios depends on the type of instrument. The Bank presumes non-TCP financial assets that are 30 days past due have experienced a SICR and are included in Stage 2. Non-TCP intercompany assets with material legal entities that are covered by the Firm's resolution and recovery plans are considered to be investment grade and therefore these are included in Stage 1 with no SICR. Finally, the remainder of the Bank's Non-TCP are mostly short-term and generally no SICR has arisen prior to the maturity of that instrument.

(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

Stage 1 – Instruments without significant increase in credit risk

Financial instruments that have not had a SICR since initial recognition are included in Stage 1. For Stage 1 instruments, ECL is calculated by considering the probability of default within 12 months after the reporting date on a collective basis and interest income is calculated on the gross carrying amount of the asset (that is, without deduction for the expected credit loss allowance).

Sensitivity analysis of ECL due to staging

The following table shows the impact of staging on the Bank's ECL recognised on balance sheet, by comparing the allowance if all performing financial assets were in Stage 1 or if all such assets were in Stage 2 to the actual ECL recorded on these assets as at 31 December 2025:

	<u>Gross loans and advances</u> RM'000	<u>ECL- All performing loans in Stage 1</u> RM'000	<u>Impact of change in staging on the Statement of Comprehensive Income</u> RM'000
Stage 1	565,036	1,358	-

Stage 2	185,851	4,990	-

ECL measurement for TCP Portfolios

Key Inputs

ECL for Stage 1 and Stage 2 assets is determined using a collective assessment model that estimates losses expected on the portfolio from possible defaults in the next 12 months for Stage 1 assets or lifetime for Stage 2 assets. The 12-month ECL are calculated by multiplying the 12-month Probability of Default, Exposure at Default and Loss Given Default. Lifetime ECL are calculated using the lifetime PD instead. These inputs are collectively known as the modeled estimate and are described in further detail below:

Probability of Default ("PD"): The PD model estimates the probability of a borrower defaulting given certain macroeconomic scenarios and the probability of a borrower moving from one risk rating to another during the reasonable and supportable period. The 12-month and lifetime PDs represent the probability of default occurring over the next 12 months and the remaining maturity of the instrument respectively.

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

ECL measurement for TCP Portfolios (continued)

Key Inputs (continued)

Exposure at Default (“EAD”): Exposure at Default represents the gross exposure of the Bank upon the obligor’s default and is characterised, as follows:

- Term Loans - EAD is 100% of exposure, net of amortisation.
- Revolving commitments - EAD is a model-based estimate that considers the expectation of future utilisation at the facility level in the case of a default under a given macroeconomic environment. After the Reasonable and Supportable (“R&S”) forecast period, a long run EAD is determined based on the facility’s risk characteristics.
- All other unfunded committed facilities - EAD is determined judgmentally and where appropriate, empirically, based on the type of credit facility, line of business, underlying risk characteristics, and utilisation.

Loss Given Default (“LGD”): LGD, also known as loss severity, represents the amount of loss, expressed as a percentage, in the event the facility defaults under a given certain macroeconomic scenarios during the reasonable and supportable period. Beyond the reasonable and supportable period long run historical average LGD is used based on the instrument’s risk characteristics (e.g., secured type, region, line of business).

Forward-looking information

ECL estimates are derived from Bank’s historical experience and future forecasted economic conditions. To incorporate forward-looking information into the ECL calculation, the Bank develops five forecasted economics scenarios (base, relative upside, extreme upside, relative downside and extreme downside). Each of these scenarios contains a set of Macroeconomic Variables (“MEVs”) that reflect forward-looking economic and financial conditions. MEVs include, but are not limited to GDP per country or country block (group of countries that have similar economic circumstances). MEVs for each scenario are projected over a reasonable and supportable forecast period of two years. After the forecast period, the losses revert to historical averages over a one-year transition period.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

Forward-looking information (continued)

On a quarterly basis, the five economic scenarios are updated and probability weighted. Judgement is involved to develop the scenarios and assign probability weightings. The most likely economic scenario in management's view is the base case which would generally be expected to be weighted more heavily than the other four scenarios.

The PD, LGD and EAD models are designed to forecast the credit quality and performance of a TCP portfolio based on industry, geography, rating and size of obligors, among other attributes of the portfolio. PD, LGD and EAD models are calibrated based on historical MEVs and use forecasted macroeconomic scenarios for projecting PD, LGD and EAD values.

ECL calculation

ECL calculation is based on the forward-looking PD, LGD, and EAD values for each of the scenarios to produce the scenario credit losses ("SCLs"). The modelled ECL estimate is a probability-weighted calculation of the five SCLs discounted using the original effective interest rate or an approximation thereof. The weightings are periodically reviewed and approved centrally by a risk governance committee within the Firm.

The modelled ECL results are reviewed by management and adjustments ('management overlays') are considered to ensure final results reflect the Bank's best estimate of ECLs on its exposures. Management overlays are only applied if necessary to account for significant idiosyncratic risks which are not yet reflected in underlying risk ratings, LGD, exposure profile or scenario weights used and which are expected to have a high probability of occurrence.

The Bank follows the policies and practices established by the Firm's Credit Risk Policy Group and BNM's Best Practices for the Management of Credit Risk and the Assessment of the Allowance for Credit Losses, to preserve the independence and integrity of the approval and decision-making process.

For Multinational Corporations ("MNC") exposures which are not supported by legally enforceable guarantee, management makes judgement based of local standalone risk grading for ECL measurement.

There have not been any significant changes in estimation techniques or assumptions made during the reporting period.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(i) Credit risk (continued)

Stage 3 portfolio estimation techniques

In estimating ECL for Stage 3 assets using an individual discounted cash flow assessment, broad economic conditions affecting a borrower are less relevant as they may not have a direct impact on the specific borrower and its ability to service its debts. Consequently, the Bank believes that borrower specific scenarios are the most relevant in estimating expected credit losses in an individual discounted cash flow assessment. When applying the discounted cash flow methodology, the Bank projects cash flows under three borrower-specific forecast scenarios that are reviewed, adjusted and ultimately blended into one-probability weighted calculation of ECL.

ECL measurement for Non-TCP portfolio

The Bank's approach to measuring ECLs for Non-TCP portfolios depends on the type of instrument.

Fee receivables

For fee receivables arising from contracts with customers (e.g. brokerage fee receivables), the Bank applies a provision matrix as a practical expedient for calculating expected credit losses. The matrix provides that in the case of institutional customers, a receivable is considered to have experienced SICR (i.e. Stage 2) if it is 90 days past due and credit-impaired (i.e. Stage 3) if it is 180 days past due at which point an ECL for 100% of the amount owned is recognised. In the case of non-institutional customers, a receivable is considered to have experienced SICR (i.e. Stage 2) if it is 30 days past due and credit-impaired (i.e. Stage 3) if it is 90 days past due at which point an ECL for 100% of the amount owned is recognised. The Bank has not had significant losses on its fee receivable portfolios and the ECL impact is considered to be immaterial.

Other Non-TCP

The Bank has determined that ECLs on all other Non-TCP portfolios are immaterial due to: the existence of credit risk mitigants such as the existence of the collateral; the credit quality of the borrower (e.g. investment-grade); and/or the short-term nature of the instrument. Similarly, the Bank has determined that these Non-TCP portfolios are without SICR (i.e. Stage 1) due to the credit quality of the borrower and/or the short-term nature of the instrument.

For inter-company loans and receivables, the Bank evaluates the counterparty based on the consolidated Firm's resolution and recovery plan, tenor of the loan/receivable, and any collateral received. The Bank has not experienced any losses on inter-company loans and receivables.

The Bank continues to monitor its Non-TCP portfolios to ensure the described framework is appropriate and its exposure to credit risk and ECLs on these portfolios is adequately reflected in the allowance for credit losses.

Transfers from Stage 2 to Stage 1	16	(16)	-	-
As at 31 December 2025	<u>1,358</u>	<u>3,192</u>	<u>33</u>	<u>4,583</u>
<u>Expected credit losses</u>				
As at 1 January 2024	10,654	4,730	54	15,438
Loans derecognised or repaid	(445)	(21)	(9)	(475)
New originated	762	-	-	762
Changes due to change in credit risk	(4,974)	(4,095)	(1)	(9,070)
Transfers from Stage 1 to Stage 2	(4,366)	4,366	-	-
Transfers from Stage 3 to Stage 2	-	10	(10)	-
As at 31 December 2024	<u>1,631</u>	<u>4,990</u>	<u>34</u>	<u>6,655</u>

The allowance on ECL recognised in the period is impacted by the following judgement criteria:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Analysis of Loans and Advances

(a) The Bank's loans and advances to customers is comprised of wholesale loans and individual loan. The table below presents the Bank's non-impaired and impaired loans.

	<u>Corporates</u> RM'000	<u>Individuals</u> RM'000	<u>Total</u> RM'000
<u>2025</u>			
Gross amount			
- Non credit-impaired	696,167	416	696,583
- Credit-impaired	-	138	138
Provision for expected credit losses	(4,482)	(101)	(4,583)
	<u>691,685</u>	<u>453</u>	<u>692,138</u>
<u>2024</u>			
Gross amount			
- Non credit-impaired	585,482	534	586,016
- Credit-impaired	-	144	144
Provision for expected credit losses	(6,521)	(134)	(6,655)
	<u>578,961</u>	<u>544</u>	<u>579,505</u>

(b) Loans and advances individually impaired

The individual impaired loans and advances to customers before taking into consideration the cash flows from collateral held is RM138,000 (2024: RM144,000).

The breakdown of the gross amount of individually impaired loans and advances by class, along with the fair value of related collateral held by the Bank as security, are as follows:

	<u>Individuals</u> RM'000	<u>Total</u> RM'000
<u>2025</u>		
Gross amount	138	138
Fair value of collateral	1,316	1,316
<u>2024</u>		
Gross amount	144	144
Fair value of collateral	1,526	1,526

(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(ii) Market risk

Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term.

Market Risk Management monitors market risks throughout the Firm and defines market risk policies, procedures and frameworks. The Market Risk Management function seeks to measure risk, facilitate risk/return decisions, reduce volatility in operating performance and provide transparency into the Firm's market risk profile.

Risk Governance & Policy Framework

The Bank's approach to market risk governance mirrors the Firmwide approach and is outlined in the Bank's Market Risk Management Framework ('Framework'), which includes the following:

- Responsibilities of the CRO and Market Risk Officer ("MRO")
- Market Risk measures utilised such as Value-at-Risk ("VaR"), stress and non-statistical measures
- Controls such as the Bank's market risk limit framework (limit levels, limit signatories, limit reviews and escalation)

The Bank's Board of Directors approves substantive changes to the Framework and approves this Framework annually.

Risk Measurement

There is no single measure to capture market risk and therefore the Bank uses various metrics both statistical and non-statistical to assess risk. The appropriate set of risk measures utilised for a given business activity is tailored based on business mandate, risk horizon, materiality, market volatility and other factors.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(ii) Market risk (continued)

VaR

The Bank utilises Value-at-Risk ("VaR"), a statistical risk measure used to estimate the potential loss from adverse market moves in the current market environment.

The VaR framework is employed across the Firm using historical simulation based on data for the previous 12 months.

VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 99% confidence level.

The table below shows the result of the Bank's VaR:

	<u>2025</u> RM'000	<u>2024</u> RM'000
99% VaR	<u>5,289</u>	<u>2,183</u>

The Bank's market risk profile is driven by Credit, Equities, Foreign Exchange, interest rate market related exposures.

Stress Testing

Along with VaR, stress testing is an important tool to assess risk. While VaR reflects the risk of loss due to adverse changes in markets using recent historical market behaviour, stress testing reflects the risk of loss from hypothetical changes in the value of market risk sensitive positions applied simultaneously. The Bank runs weekly stress tests on market-related risks across the lines of business using multiple scenarios that assume significant changes in risk factors such as credit spreads, equity prices, interest rates, currency rates or commodity prices.

The Bank uses a number of standard scenarios that capture different risk factors across asset classes including geographical factors, specific idiosyncratic factors and extreme tail events. The stress testing framework calculates multiple magnitudes of potential stress for both market rallies and market sell-offs for each risk factor and combines them in multiple ways to capture different market scenarios. The flexibility of the stress testing framework allows risk managers to construct new, specific scenarios that can be used to form decisions about future possible stress events.

Stress testing complements VaR by allowing risk managers to shock current market prices to more extreme levels relative to those historically realised, and to stress test the relationships between market prices under extreme scenarios.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(ii) Market risk (continued)

Stress Testing (continued)

Stress-test results, trends and qualitative explanations based on current market risk positions are reported to the Bank's RALCO to allow them to better understand the sensitivity of positions to certain defined events and to enable them to monitor their risks with more transparency. In addition, results are reported to the Board of Directors.

Stress scenarios are defined and reviewed by Market Risk, and significant changes are reviewed by the relevant line of business's risk committees and may be redefined on a periodic basis to reflect current market conditions.

Non-Statistical Risk Measures

Measures such as, but not limited to, credit spread sensitivities, option sensitivities, net open positions, basis point values are utilised within specific market context and aggregated across businesses.

Limits

Market risk limits are employed as the primary control to align the Bank's market risk with certain quantitative parameters within the Bank's Risk Appetite framework.

Market Risk sets market risk limits and these are subject to the RALCO approval who confirms compliance with local regulatory requirements.

As part of its holistic analysis of the Bank's market risk, Market Risk must review market risk limits for the Bank at least semi-annually. Limit reviews must consider the underlying trading, investing and hedging strategies of the business as well as capital or regulatory requirements where applicable.

(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(ii) Market risk (continued)

Risk Reporting

The Firm and the Bank have their own set of regular market risk reports, which include daily notifications of limit utilisations and limit breaches and where applicable, granular market risk metrics which provide transparency into potential risk concentrations.

Models used to measure market risk are inherently imprecise and may be limited in their ability to measure certain risks or to predict losses. This imprecision may be heightened when sudden or severe shifts in market conditions occur.

Market Risk Management periodically reviews the Bank's existing market risk measures to identify opportunities for enhancement, and to the extent appropriate, will calibrate those measures accordingly over time. This is increasingly important in periods of sustained, heightened market volatility.

(iii) Operational risk

Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's and Bank's processes or systems. Operational Risk includes compliance, conduct, legal, and estimations and model risk. Operational risk is inherent in the Bank's activities and can manifest itself in various ways, including fraudulent acts, business disruptions (including those caused by extraordinary events beyond the Firm's and the Bank's control), cyber-attacks, inappropriate employee behavior, failure to comply with applicable laws, rules and regulations or failure of vendors or other third party providers to perform in accordance with their agreements. Operational Risk Management attempts to manage operational risk at appropriate levels in light of the Firm's and the Bank's financial position, the characteristics of its businesses, and the markets and regulatory environment in which they operates.

The Firm's Compliance, Conduct, and Operational Risk ("CCOR") Management Framework is designed to enable the Firm and the Bank to govern, identify, measure, monitor and test, manage and report on the Firm's and the Bank's operational risk.

(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(iii) Operational risk (continued)

Operational Risk Governance

The Lines of Business (“LOB”) and Corporate are responsible for the management of operational risk. The Control Management Organisation, which consists of control managers within each LOB and Corporate, is responsible for the day-to-day execution of the CCOR Management Framework.

The Bank maintains a system of comprehensive policies and control framework designed to provide a sound and well-controlled operational environment. Primary responsibility for managing operating risk rests with the business managers. These individuals, with the support of their staff, are responsible for establishing and maintaining internal control procedures that are appropriate for their operating environments. To this end, the objectives of each business activities are identified and the risks associated with those objectives are assessed. The business managers institute a series of standards and procedures to manage these risks and to comply with the Bank’s operational risk related policies, considering their nature and magnitude.

Internal Audit conducts annual audits and reviews on key operation areas. The focus of the audit is to provide assurance to management on the compliance with statutory requirements, law, corporate policies and internal guidelines.

Operational Risk Identification

The Firm, including the Bank utilises a structured risk and control self-assessment process that is executed by the LOBs and Corporate. As part of this process, the LOBs and Corporate evaluate the effectiveness of their respective control environment to assess where controls have failed, and to determine where remediation efforts may be required. The Firm’s Operational Risk and Compliance organisation (“Operational Risk and Compliance”) provides oversight of and challenge to these evaluations activities and may also perform independent assessments of significant operational risk events and area of concentrated or emerging risk.

Operational Risk Measurement

Operational Risk and Compliance performs an independent assessment of the operational risks inherent within the LOBs and Corporate, which includes evaluating the effectiveness of the control environment and reporting the results to senior management.

In addition, Operational Risk and Compliance assesses operational risks through quantitative means, including operational risk-based capital and estimation of operational risk losses under both baseline and stressed conditions.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(iii) Operational risk (continued)

Operational Risk Monitoring and Testing

The results of risk assessments performed by Operational Risk and Compliance are used in connection with their independent monitoring and testing compliance of the LOBs and Corporate with laws, rules and regulations. Through monitoring and testing, Operational Risk and Compliance independently identify areas of heightened operational risk and tests the effectiveness of controls within the LOBs and Corporate.

Management of Operational Risk

The operational risk areas or issues identified through monitoring and testing are escalated to the LOBs and Corporate to be remediated through action plans, as needed, to mitigate operational risk. Operational Risk and Compliance may advise the LOBs and corporate functions in the development and implementation of action plans.

Operational Risk Reporting

All employees are expected to escalate risks appropriately. Risks identified by Operational Risk and Compliance are escalated to the appropriate LOB and Corporate Control Committees, as needed. Operational Risk and Compliance has established standards designed to ensure that consistent operational risk reporting and operational risk reports are produced on a Firmwide basis as well as by the LOBs and Corporate. Reporting includes the evaluation of key risk and performance indicators against established thresholds as well as the assessment of different types of operational risk against stated risk appetite. The standards reinforce escalation protocols to senior management and to the Board of Directors.

(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(iv) Interest rate risk

Interest Rate Risk in the Banking Book ("IRRBB") is defined as interest rate risk resulting from the Bank's traditional banking activities as a result of movements in interest rates. IRRBB can occur due to a variety of factors, including but not limited to:

- Differences between the timing of rate changes and the timing of cash flows (repricing risk);
- Changing rate relationships among yield curves that affect bank activities (basis risk);
- Changing rate relationships across the spectrum of maturities (yield curve risk); and
- Interest-rate-related options embedded in banking products (option risk).

Treasury/ Chief Investment Office ("T/CIO") manages IRRBB exposure on behalf of the Bank by identifying, measuring, modelling, and monitoring IRR across the Bank's balance sheet. T/CIO works with the Lines of Businesses in defining methodologies for measuring IRRBB. T/CIO identifies and understands material balance sheet impact of new initiatives and products, and executes market transactions to manage IRRBB.

The Bank's IRRBB exposure originates from the traditional banking activities that include the extension of loans, taking client deposits. T/CIO is managing the exposure through placements/takings, and the purchase of securities under T/CIO investment portfolio. The majority of the Bank's deposits are Non-Maturity Deposits ("NMD") that is modelled as longer dated liabilities by considering deposits run-off profile and analysing deposits' sensitivity to rate changes. Loans, Placements, Term Deposits, Placements, and Investment Securities under T/CIO investment portfolio are assumed to have contractual maturity with fixed or adjustable rate.

IRRBB is evaluated using two primary metrics, impact to the Bank's earnings through Earnings at Risk ("EaR") metric, and impact to the Bank's equity through Economic Value Sensitivity ("EVS") metric:

- EaR measures the extent to which changes in interest rates will affect the Bank's net interest income ("NII") over the following 12 months period under four parallel shift scenarios in interest rate curve.
- EVS determines changes in Economic Value of Equity ("EVE") due to changes in interest rates under two parallel and four non-parallel shift scenarios in interest rate curve.

The IRRBB metrics are regularly monitored, reported on a regular basis and presented in the Bank's RALCO Meeting.

(v) Currency risk

Currency risk is the risk to earnings and value of financial instruments caused by the fluctuations in foreign exchange rates. It is managed in conjunction with market risk.

The table at the following page sets out the Bank's exposure to currency risk. Included in the table are the Bank's financial assets and liabilities at carrying amounts, categorised by currency.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(vi) Liquidity risk

Liquidity risk is the risk that the Bank will be unable to meet its contractual and contingent financial obligations as they arise or that it does not have the appropriate amount, composition and tenor of funding and liquidity to support its assets and liabilities.

The Bank's liquidity risk tolerance, also referred to as liquidity risk appetite, requires the maintenance of sufficient stable funding to support long-term assets, as measured by the Net Stable Funding Ratio (NSFR), and the holding of high-quality liquid assets (HQLA) to cover potential cash outflows, as measured by the Liquidity Coverage Ratio (LCR). In addition, the Bank is required to maintain an adequate liquid asset buffer relative to net outflows that could arise under a combined idiosyncratic and market-wide stress scenario (the 'JPM Stress scenario'). Liquidity risk tolerance and appetite levels are governed through a comprehensive framework of liquidity risk limits and indicators, as documented in the Firm's Liquidity Limits and Indicators Standard.

Liquidity risk management

The Liquidity Risk management ("LRM") group is part of CIO Treasury and Corporate ("CTC") Risk, an Independent Risk Management function, reporting to the CTC Chief Risk Officer ("CRO") who also serves as the Firmwide Risk Executive of Liquidity Risk. LRM is responsible for the independent assessment, measuring, monitoring, and control of liquidity risk across the firm. LRM responsibilities include, but are not limited to:

- Defining, monitoring and reporting liquidity risk metrics;
- Independently establishing and monitoring limits and indicators including liquidity risk appetite;
- Developing a process to classify, monitor and report limit breaches;
- Performing an independent review of liquidity risk management processes;
- Monitoring and reporting internal Firmwide and legal entity liquidity stress tests as well as regulatory defined metrics, as well as liquidity positions, balance sheet variances, and funding activities; and
- Approving or escalating for review new or updated liquidity stress assumptions.

Liquidity management

Treasury/ Chief Investment Office ("T/CIO") are responsible for liquidity management. The primary objectives of Firm's liquidity management are to:

- Ensure that the Firm's core businesses and material legal entities are able to operate in support of client needs and meet contractual and contingent financial obligations through normal economic cycles as well as during stress events, and
- Manage an optimal funding mix, and availability of liquidity sources.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(vi) Liquidity risk (continued)

Risk governance and measurement

The Board of Directors of the Bank has delegated oversight of liquidity risk to Malaysia Risk/ Assets and Liabilities Committee ("RALCO"). Liquidity risk management is governed by Malaysia RALCO, co-chaired by the Senior Country Officer and Chief Risk Officer.

As governed by the Malaysia RALCO Terms of Reference, where required, matters will be escalated from Malaysia RALCO to the Malaysia Location Management Committee, Asia Pacific Risk Committee or the Board of Directors. In addition, the Board Risk Committee reviews and recommends to the Board of Directors, for formal approval, the Bank's liquidity risk tolerances, liquidity strategy, and liquidity policy.

Contingency funding plan

The Firm's contingency funding plan ("CFP") is approved by the Firmwide ALCO and the Board risk Committee. The Bank's addendum to the CFP is approved by the Bank's Board of Directors. The CFP and the addendum is a compilation of procedures and action plans for managing liquidity through stress events. The CFP and the addendum incorporate the limits and indicators set by the Liquidity Risk Management group. These limits and indicators are reviewed regularly to identify emerging risks or vulnerabilities in the Bank's liquidity position. The CFP identifies the alternative contingent funding and liquidity resources available to the Bank in a period of stress.

Limits and Indicators

The Bank has established internal liquidity risk limits and indicators which are monitored on a daily basis.

Stress Testing

Liquidity risk stress testing is established to ensure that the Bank has sufficient liquidity under a variety of adverse scenarios. The results of the liquidity stress tests are significant inputs into the formulation of funding and balance sheet planning.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

32 FINANCIAL RISK MANAGEMENT (CONTINUED)

(vi) Liquidity risk (continued)

Liquidity Coverage Ratio and Net Stable Funding Ratio

The Liquidity Coverage Ratio (“LCR”) and Net Stable Funding Ratio (“NSFR”) are key measures of liquidity risk, with higher ratios indicating lower risk levels. Both ratios are calculated in accordance with the standards prescribed by BNM and are reported to the central bank.

LCR measures the amount of high-quality liquid assets (“HQLA”) maintained by the Bank to meet projected total net cash outflows over a 30-day period under conditions of significant financial stress. HQLA primarily consists of unencumbered cash and high-quality liquid securities held by the bank. BNM requires banks to maintain a minimum LCR of 100%, with reporting on a monthly basis. For the 12 months ended December 31, 2025, the Bank’s average LCR was 156%, compared to 165% for the preceding 12 months ended December 31, 2024.

NSFR requires banking institutions to maintain sufficient available stable funding to meet required stable funding over a one-year time horizon. BNM mandates a minimum NSFR of 100%, with reporting on a quarterly basis. The Bank’s average NSFR for 2025 was 392%, compared to 445% for 2024.

The decreases in both the Bank’s LCR and NSFR in 2025 compared to 2024 were primarily attributable to increase in the proportion of assets not qualifying as HQLA. Both ratios remained well above regulatory minimum requirements, reflecting the Bank’s strong liquidity position.

Funding

The Bank funds its balance sheet through a diverse range of sources, including a customer deposit, secured funding via repurchase agreements, capital funds, and borrowings from its head office. Concentration risk is actively monitored by the Liquidity Risk Management team. Deposits exceeding those required to fund loans are primarily invested in Level 1 HQLA, invested in the Bank’s investment securities portfolio or deployed in cash or other short-term liquid investments based on their interest rate and liquidity risk characteristics.

The table at the following page analyses the Bank’s non-derivative financial assets and financial liabilities into relevant maturity groupings based on the remaining period from the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

33 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

(a) Financial instruments not measured at fair value

(i) Certain financial instruments

For cash and short-term funds, amount due from/to related parties, statutory deposits with BNM, deposits from customers, deposits and placements of banks and other financial institutions with maturities of less than one year, the carrying value is a reasonable estimate of fair value.

For balances relating to the above classes of financial instruments with maturities of more than one year, the carrying value approximates the fair value as these balances are subject to variable interest rate.

(ii) Loans and advances

For non-impaired fixed rate loans, fair values have been estimated by discounting the estimated cash flows using the prevailing market rates of loans and advances with similar credit ratings and maturities. For floating-rate loans, the carrying amount is generally a reasonable estimate of fair value.

The fair value of impaired loans, fixed or floating are based on the carrying value less allowances for ECL, being the expected recoverable amount. In arriving at the fair values for loans on the above bases, the total fair value of the entire loan portfolio has been reduced by RM4,583,000 (2024: RM6,655,000), being the carrying value of the allowance for ECL which covers unidentified losses inherent in the portfolio.

(iii) Credit commitments

The estimated fair values are not readily ascertainable as these financial instruments are generally not traded. In addition, the quantum of fees collected under these arrangements, upon which a fair value could be based, is not material.

(b) Financial instruments measured at fair value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is based on quoted market prices or inputs, where available. If listed prices or quotes are not available, fair value is based on valuation models and other valuation techniques that consider relevant transaction characteristics (such as maturity) and use as inputs observable or unobservable market parameters, including yield curves, interest rates, volatilities, prices (such as commodity, equity or debt prices), correlations, foreign exchange rates and credit curves.

J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

33 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(b) Financial instruments measured at fair value (continued)

The level of precision in estimating unobservable inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Bank believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgement and may vary across the Bank's businesses and portfolios. The use of different methodologies or assumptions to those used by the Bank could result in a different estimate of fair value at the reporting date.

Risk-taking functions are responsible for providing fair value estimates for assets and liabilities carried on the balance sheet at fair value. The Firm's valuation control function, which is part of the Firm's Finance function and independent of the risk-taking functions, is responsible for verifying these estimates and determining any fair value adjustments that may be required to ensure that the Bank's positions are recorded at fair value. The valuation control function verifies fair value estimates provided by the risk-taking functions by leveraging independently derived prices, valuation inputs and other market data, where available.

In determining the fair value of a derivative portfolio, valuation adjustments may be appropriate to reflect the credit quality of the counterparty, the credit quality of the Bank, and the funding risk inherent in certain derivatives. The credit and funding risks of the derivative portfolio are generally mitigated by arrangements provided to the Bank by JPMorgan Chase Bank, N.A. and therefore the Bank takes account of these arrangements in estimating the fair value of its derivative portfolio.

Valuation model review and approval

If prices or quotes are not available for an instrument or a similar instrument, fair value is generally determined using valuation models that consider relevant transaction terms such as maturity and use as inputs market-based or independently sourced parameters. The Model Risk function is independent of the model owners and reviews and approves valuation models used by the Bank.

FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

33 **FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (CONTINUED)**

(b) Financial instruments measured at fair value (continued)

Fair value hierarchy

The Bank classifies its assets and liabilities according to a valuation hierarchy that reflects the observability of significant market inputs. The three levels are defined as follows:

- (a) Level 1: inputs to the valuation methodology include quoted prices (unadjusted) for identical assets or liabilities in active market;
- (b) Level 2: inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument;
- (c) Level 3: one or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorisation within the valuation hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following table represents the Bank's financial assets and liabilities measured at fair value as at financial year ended:

<u>2025</u>	<u>Level 1</u> RM'000	<u>Level 2</u> RM'000	<u>Level 3</u> RM'000	<u>Total</u> RM'000

Valuation methodologies

The following table describes the valuation methodologies used by the Bank to measure its more significant products/ instruments at fair value, including the general classification of such instruments pursuant to the valuation hierarchy.

Product/ instrument	Valuation methodology, inputs and assumptions	Classifications in the valuation hierarchy
Equity, debt, and other securities	Quoted market prices	Level 1
	In the absence of quoted market prices, securities are valued based on: <ul style="list-style-type: none"> • Observable market prices for similar securities • Relevant broker quotes • Discounted cash flows 	Level 2 or 3
Derivatives, fully funded OTC instruments, and structured deposits	Exchange-traded derivatives that are actively traded and valued using the exchange price	Level 1
	Derivatives and structured deposits that are valued using models that use observable or unobservable valuation inputs as well as considering the contractual terms. The key valuation inputs used will depend on the type of derivative and the nature of the underlying instruments and may include equity prices, commodity prices, interest rate yield curves, foreign exchange rates, volatilities, correlations, credit default swaps ("CDS") spreads and recovery rates.	Level 2 or 3

In infrequent circumstances where the valuation technique for these instruments is based on significant unobservable inputs, such instruments are included in Level 3. This category includes unquoted shares and structured deposits. The fair values of unquoted shares are based on the net tangible assets of the affected companies or sales price for pending sales transactions, while the fair values of structured deposits are based on Quanto and Volatility element.

33 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (CONTINUED)

(b) Financial instruments measured at fair value (continued)

Changes in and ranges of unobservable inputs

The following discussion provides a description of the impact on a fair value measurement of a change in each unobservable input in isolation, and the interrelationship between unobservable inputs, where relevant and significant. The impact of changes in inputs may not be independent as a change in one unobservable input may give rise to a change in another unobservable input; where relationships exist between two unobservable inputs, those relationships are discussed below. Relationships may also exist between observable and unobservable inputs (for example, as observable interest rates rise, unobservable prepayment rates decline); such relationships have not been included in the discussion below. In addition, for each of the individual relationships described below, the inverse relationship would also generally apply.

Correlation - Correlation is a measure of the relationship between the movements of two variables. Correlation is a pricing input for a derivative product where the payoff is driven by one or more underlying risks.

Correlation inputs are related to the type of derivative (e.g., interest rate, credit, equity and foreign exchange) due to the nature of the underlying risks. When parameters are positively correlated, an increase in one parameter will result in an increase in the other parameter. When parameters are negatively correlated, an increase in one parameter will result in a decrease in the other parameter. An increase in correlation can result in an increase or a decrease in a fair value measurement. Given a short correlation position, an increase in correlation, in isolation, would generally result in a decrease in a fair value measurement.

Volatility - Volatility is a measure of the variability in possible returns for an instrument, parameter or market index given how much the particular instrument, parameter or index changes in value over time. Volatility is a pricing input for options, including equity options, commodity options, and interest rate options. Generally, the higher the volatility of the underlying, the riskier the instrument. Given a long position in an option, an increase in volatility, in isolation, would generally result in an increase in a fair value measurement.

FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2025 (CONTINUED)

34 **EMPLOYEE BENEFITS**

Share-based payment awards

The incentive compensation benefits are determined by the ultimate holding corporation, the Firm. The following schemes are applicable to the employees of the Firm:

Long-Term Incentive Plan ("LTIP")

Under the LTIP, common stock-based awards, including stock options, restricted stock, and restricted stock units ("RSU") are granted to certain key employees employed by the Firm and its subsidiaries.

Restricted stock units ("RSUs") are awarded at no cost to the recipient upon their grant. RSUs are generally granted annually and generally vest at a rate of 50% after two years, 50% after three years, and convert into shares of common stock at the vesting date. In addition, RSUs typically include full-career eligibility provisions, which allow employees to continue to vest upon voluntary termination, subject to post-employment and other restrictions based on age or service-related requirements. All of these awards are subject to forfeiture until vested and contain clawback provisions that may result in cancellation prior to vesting under certain specified circumstances. RSUs entitle the recipient to receive cash payments equivalent to any dividends paid on the underlying common stock during the period the RSUs are outstanding.

(a) **Restricted Stock and RSUs**

The movements and weighted average fair value of restricted stock and RSUs are as follows:

	2025		2024	
	Number of restricted stock/RSU	Weighted average fair value at grant date USD	Number of restricted stock/RSU	Weighted average fair value at grant date USD
Outstanding at 1 January	9,789	152.80	12,779	145.80
Granted during the year	3,342	264.40	4,247	166.20
Vested during the year	(4,383)	(147.60)	(5,334)	(146.60)
Cancelled during the year	(378)	(192.80)	(1,903)	(153.20)
Outstanding at 31 December	8,370	198.20	9,789	152.80

2024							
Derivative financial instruments	1,032,512	-	1,032,512	-	155,096	877,416	877,416
Obligations on securities sold	7,867,552	-	7,867,552	-	249,534	7,618,018	7,618,018
	<u>8,900,064</u>	<u>-</u>	<u>8,900,064</u>	<u>-</u>	<u>404,630</u>	<u>8,495,434</u>	<u>8,495,434</u>

For the financial assets and liabilities subject to enforceable master netting arrangements or similar arrangements above, each agreement between the Bank and the counterparty allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis. In the absence of such an election, financial assets and liabilities will be settled on a gross basis, however, each party to the master netting agreement or similar agreement will have the option to settle all such amounts on a net basis in the event of default of the other party.

INDEPENDENT AUDITORS' REPORT
TO THE MEMBER OF J.P. MORGAN CHASE BANK BERHAD
(Incorporated in Malaysia)
Registration No. 199401030666 (316347-D)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Our opinion

In our opinion, the financial statements of J.P. Morgan Chase Bank Berhad ("the Bank") give a true and fair view of the financial position of the Bank as at 31 December 2025, and of its financial performance and its cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

What we have audited

We have audited the financial statements of the Bank, which comprise the statement of financial position as at 31 December 2025, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the financial year then ended, and notes to the financial statements, including a summary of material accounting policies, as set out on pages 7 to 106.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and other ethical responsibilities

We are independent of the Bank in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), as applicable to audits of financial statements of public interest entities and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Information other than the financial statements and auditors' report thereon

The Directors of the Bank are responsible for the other information. The other information comprises the Directors' Report, but does not include the financial statements of the Bank and our auditors' report thereon.

Our opinion on the financial statements of the Bank does not cover the other information and we do not express any form of assurance conclusion thereon.

**INDEPENDENT AUDITORS' REPORT
TO THE MEMBER OF J.P. MORGAN CHASE BANK BERHAD (CONTINUED)**
(Incorporated in Malaysia)
Registration No. 199401030666 (316347-D)

In connection with our audit of the financial statements of the Bank, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Bank or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors of the Bank are responsible for the preparation of the financial statements of the Bank that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Bank that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Bank, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Bank as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Bank, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

INDEPENDENT AUDITORS' REPORT
TO THE MEMBER OF J.P. MORGAN CHASE BANK BERHAD (CONTINUED)
(Incorporated in Malaysia)
Registration No. 199401030666 (316347-D)

- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Bank or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Bank, including the disclosures, and whether the financial statements of the Bank represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

OTHER MATTERS

This report is made solely to the member of the Bank, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.
