

# J.P. Morgan Private Assets Index (JPAX) – Middle Market

- J.P. Morgan Private Assets Index (JPAX)-Middle Market tracks the operating performance, leverage, interest coverage, as well as equity value growth of mid-sized U.S. private companies with annual revenues between \$10mn-\$1bn.
- JPAX-Middle Market aggregates company financial statements directly from underlying middle market businesses to produce an institutional-grade benchmark, distinct from indices built on fund returns, sponsor-reported or survey-based inputs.
- The index can serve as a diagnostic benchmark for GPs, LPs, lenders, and corporates to assess middle market performance.
- The index features breakouts across 10 sectors, 20 sub-sectors, 11 revenue cohorts, 7 leverage tiers (Debt/EBITDA), and 6 profitability buckets (EBITDA margin). Inception of the index is December 31, 2019.

## Overview

The J.P. Morgan Private Assets Index (JPAX)-Middle Market is an institutional-grade benchmark built on verified company financials for the U.S. private middle market – a segment of over 200,000 companies generating approximately \$13 trillion in revenue and accounting for one-third of U.S. private-sector GDP.

A growing share of privately held middle market businesses are owned by founders requiring strategic private capital. Yet the growing economic significance stands in sharp contrast to the limited maturity of its measurement and benchmarking infrastructure. In the opaque private markets, most existing indices rely on fund level performance or survey-based data.

Aiming to address the gap, the JPAX-Middle Market offers sector level and cohort level measures built upon private middle market companies' financial statements.

Index Facts	
<b>Launch Date</b>	May 6, 2026
<b>Inception Date</b>	December 31, 2019
<b>Constituents</b>	Over 6,400 U.S. private middle market companies
<b>Revenue criteria</b>	Annual revenue between \$10mn - \$1bn
<b>Granularity</b>	50+ discrete sub-indices, including 10 sectors, 20 sub-sectors, 11 revenue cohorts, 7 leverage tiers (Debt/EBITDA) and 6 profitability buckets (EBITDA margin)
<b>Analytics</b>	Financial metrics across leverage, liquidity, profitability and activity ratios
<b>Weighting Method</b>	Equity value weighted
<b>Index Frequency</b>	Monthly (last U.S. business day)
<b>Rebalance</b>	Monthly (last U.S. business day)
<b>Data Sources</b>	J.P. Morgan and FactSet
<b>DataQuery</b>	DB(BIGI,JPAX_MM.HEADLINE,,TR) DB(BIGI,JPAX_MM.BASELINE,,TR)
<b>BBG</b>	JMMPHTR (Headline)

The index offers **two complementary equity value growth return series**:

- 1) **The Headline Composite series:** a current-period estimate that pairs the latest available company fundamentals with current month's industry multiples. The index is updated on a rolling basis as new financials are received. The headline composite series is calculated for the latest rebalance month.
- 2) **The Baseline Historical series:** a fully observed counterpart, locking in the definitive performance record once reporting for a given valuation date is substantially complete. The baseline historical series is published for the financial reporting period 12 months prior and uses public market industry multiple as of the valuation date.

## Index Structure

The index suite offers **over 50 discrete sub-indices**:

- **Industry Classifications:** 10 key sectors and 20 sub-sectors that are representative of the U.S. middle market.
- **Middle Market Segments:** 11 revenue cohorts, spanning lower, core, and upper middle market.
- **Leverage Tiers:** 7 Debt/EBITDA buckets.
- **Profitability Bands:** 6 EBITDA margin buckets.

## Index Return Components

For both the Headline Composite and the Baseline Historical levels, the index returns can be attributed to **three components**:

- Top-line growth (revenue change)
- Net debt change, defined as total debt minus cash and cash equivalents
- Public market equivalent industry multiple change, using Enterprise Value/Sales ratio

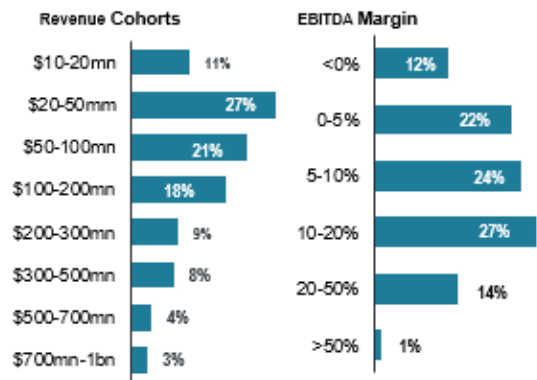

Source: J.P. Morgan, index distribution as of April 30<sup>th</sup>, 2026.

## Index Rebalancing

The index is published and rebalanced **on a monthly basis**. At each month end, the index will:

- Rebalance the constituents using the most recent available financial statements.
- Incorporate additions and removals of covered companies as per the Index criteria.
- Refresh the index series for equity value growth using the latest available company financial statements and public market equivalent industry multiples.
- Update index statistics for nearly 20 financial ratios to track the financial health of the middle market segment.

## Disclosures

---

The JPAX-Middle Market is constructed using private company financial statements sourced through an internal financial data infrastructure. The Administrator (Global Index Research Group - GIRG) relies on the data as provided and does not independently audit or adjust individual company financial statements. The integrity of the underlying data is subject to the accuracy and completeness of financial disclosures provided by private companies. Private company financial statements are not subject to the same public disclosure and regulatory requirements as those of publicly traded companies, and the quality, detail, and timeliness of such disclosures may vary across constituents. Certain derived metrics, including cash flow from operations and debt service coverage, depend on the availability of underlying line items that are not universally reported across the private middle market universe.

## General

This material has been prepared by personnel in J.P. Morgan's Global Index Research Group and is provided for informational purposes only. **ESG Data Integrity:** Where an index administered by the Index Administrator pursues environmental, social or governance (ESG) objectives, the Index Administrator is, wholly or in part, reliant on public sources of information and other third party sources. Further, the ability of the Index Administrator to verify such objectives may be limited by the integrity, quality, and detail of the data available in respect of the underlying constituents at the relevant point in time and the status and evolution of global laws, guidelines, regulations, and market practice in relation to the preparation, tracking and provision of such data. Therefore, such disclosures are made on a commercially reasonable efforts basis and are subject to change. In particular, new laws, guidelines or regulations may be introduced in relation to the methodology used to provide corporate ESG ratings which could impact the Index Administrator's ESG index score and the relevant screenings and exclusions and cause them to change. ESG data may be inconsistent across providers. The Index Administrator's ESG index score, relevant screenings and exclusions and related disclosures are also subject to change as a result of periodic reviews conducted by the Index Administrator in relation to the sources of ESG data. In calculating the index in line with the methodology articulated herein, the Index Administrator relies on the data provided by the ESG data providers. The Index Administrator does not independently source its own ESG data or exercise any discretion with respect to the substitution of third party ESG data. The integrity of the ESG data sourced from third parties is limited by the ability of those providers to source accurate data on the ESG performance of certain corporate structures, such as parent versus subsidiary, including SPVs, holding company versus operating company and the activities of any affiliated entities and derived structures. Further, ESG data pertaining to sovereign issuers is limited to the sourcing of ESG performance data at the level of the relevant country. The current data integrity landscape means it is not possible to screen all issuers for exclusion (e.g. issuers other than corporate and quasi-sovereign issuers). Issuers in respect of whom ESG data is limited may still be included in the index.
