J.P. Morgan is one of the most highly capitalized market leaders in the futures and options brokerage business. We have been providing research, sales, execution and clearing services across fixed income, equity, foreign exchange and commodity asset classes since 1979. Today, we clear more than 70 exchanges, with electronic trading access to over 50 of them.

**Research**

J.P. Morgan offers comprehensive, in-depth research on listed derivatives, OTC derivatives and their associated underlying cash markets.

J.P. Morgan’s research teams are well regarded for quantitative analysis, focusing on value comparisons among listed futures and options, cash markets and various derivative instruments. Our derivatives research programs can be customized to help clients tailor their individual risk management and investment strategy needs. Analytical models, daily reports and interactive tools are available.

J.P. Morgan’s sales and research teams provide local market expertise and in-depth analysis to help clients create and execute effective trading, hedging and portfolio management strategies.

**Electronic Client Solutions**

Electronic Client Solutions (ECS) encompasses equities, futures and options asset classes. ECS designs, distributes and services leading-edge analytics, execution and liquidity products globally to our client base. The complete ECS suite of electronic products for futures is designed to provide access to more than 70 exchanges globally with solutions tailored to clients’ requirements. These include:

- Extensive range of execution and order management solutions
- Global direct market access, including low-latency connectivity
- Global algorithmic trading products
- Pre- and post-trade analytics
- Comprehensive risk management controls

ECS offers 24-hour “follow-the-sun” electronic trading coverage, providing:

- Trade monitoring and support
- Execution strategy, market and product knowledge
- Contingency execution
- Risk mitigation

**Execution Services**

J.P. Morgan offers a complete range of execution choices, including centralized execution support and access to local specialists. A choice of electronic solutions provides access to our extensive global exchange network. The firm’s presence in major financial centers around the world enables us to monitor transaction flows and market trends 24 hours a day.

**Clearing Services**

J.P. Morgan has been at the forefront of many of the practices and services that have become standard in the futures and options industry. We have built our client franchise by developing long-term relationships and delivering exceptional service. J.P. Morgan has a structured approach to client management with global service teams who are available 24 hours a day, multi-lingual, and dedicated to the futures and options product.

Nearly all of J.P. Morgan’s business is conducted on exchanges where we maintain direct clearing memberships. Our core processing system operates in a global environment and is volume-insensitive.

**Clearing Solutions**

Dedicated support, development and client teams are available to assist clients in choosing the clearing and integration solutions that best serve their requirements. The award-winning post-trade functionality of J.P. Morgan Markets is designed to achieve straight-through processing from execution to clearing and settlement.

The post-trade capabilities of J.P. Morgan Markets provide a flexible and innovative clearing system to clients. Ongoing development is client-driven and provides functionality such as a real-time online trade reconciliation tracker, an expiry position tracker, and automated splits and allocations.

J.P. Morgan’s client education programs and online tutorials are comprehensive and can be customized to suit clients’ requirements.
J.P. Morgan Markets services are not available in all countries at this time. Please consult your J.P. Morgan representative to learn more about the services available to you.
